Portfolio Highlights for the Quarter Ended December 31, 2015

The Company realized interest income of \$4.4 million from its Excess MSR portfolio and servicing fee income of \$1.1 million from its MSR portfolio. Carrying value of the Servicing Related Assets portfolio ended the quarter at \$97.8 million. Net interest spread for the RMBS portfolio stood at 1.46% and the debt-to-equity ratio on the aggregate portfolio ended the quarter at 3.1x.

The RMBS portfolio had a book value of \$508.4 million and a carrying value of \$508.2 million at quarter end December 31, 2015. The portfolio had a weighted average coupon of 3.7% and weighted average maturity of 23 years.

In order to mitigate duration risk and interest rate risk associated with the Company's RMBS, Cherry Hill used interest rate swaps and swaptions. At quarter end December 31, 2015, the Company held interest rate swaps with a notional amount of \$300.3 million and swaptions with a notional amount of \$85 million.

As of December 31, 2015, Cherry Hill's GAAP book value was \$20.13 per diluted share, a 0.2% decline from book value per share of \$20.18 as of September 30, 2015.

Dividend

On December 10, 2015, the Board of Directors declared a quarterly dividend of \$0.49 per share of common stock for the fourth quarter of 2015. The dividend was paid in cash on January 26, 2016 to stockholders of record as of the close of business on December 31, 2015.

Core Earnings

Core earnings is a non-GAAP financial measure and is defined as GAAP net income (loss) applicable to common stockholders, excluding realized gain (loss) on RMBS, realized gain (loss) on derivatives, realized gain (loss) on acquired assets, unrealized gain (loss) on derivatives, unrealized gain (loss) on investments in Excess MSRs and unrealized gain (loss) on investments in MSRs and adjusted to exclude outstanding LTIP units in the Company's operating partnership. Additionally, core earnings excludes (1) any estimated "catch up" premium amortization (benefit) cost due to the use of current rather than historical estimates of CPR for amortization of Excess MSRs and (2) the amortization of MSRs. Core earnings are provided for purposes of comparability to other issuers that invest in residential mortgage-related assets. The Company believes providing investors with core earnings, in addition to related GAAP financial measures, gives investors greater transparency into the Company's ongoing operational performance. The concept of core earnings does have significant limitations, including the exclusion of realized and unrealized gains (losses), and may not be comparable to similarly-titled measures of other peers, which may use different calculations. As a result, core earnings should not be considered a substitute for the Company's GAAP net income (loss) or as a measure of the Company's liquidity.

The following table provides a reconciliation of net income to core earnings for the three months ended December 31, 2015 and 2014:
