The unpaid principal balance for the MSR portfolio stood at \$20.4 billion as of March 31, 2022 and the carrying value of the MSR portfolio ended the quarter at \$246.1 million. In order to mitigate duration risk and interest rate risk associated with the Company's RMBS and MSRs, Cherry Hill used interest rate swaps, swaptions, TBAs, Treasury futures and options on Treasury futures. At quarter end March 31, 2022, the Company held interest rate swaps with a notional amount of \$1.4 billion, swaptions with a notional amount of \$40.0 million, TBAs with a notional amount of \$166.6 million, Treasury futures with a notional amount of (\$271.3) million and options on Treasury futures with a notional amount of \$70.0 million.

The dividends were paid in cash on April 18, 2022 to Series A and B Preferred stockholders of record as of the close of business on March 31, 2022.

Earnings Available for Distribution

Earnings available for distribution ("EAD") is a non-GAAP financial measure that the Company defines as GAAP net income (loss), excluding realized gain (loss) on RMBS, realized and unrealized gain (loss) on derivatives, realized gain (loss) on acquired assets, realized and unrealized gain (loss) on investments in MSRs (net of any estimated MSR amortization) and any tax (benefit) expense on realized and unrealized gain (loss) on MSRs. MSR amortization refers to the portion of the change in fair value of the MSR that is primarily due to the realization of cashflows, runoff resulting from prepayments and an adjustment for any gain or loss on the capital used to purchase the MSR. EAD also includes interest rate swap periodic interest income (expense) and drop income on TBA dollar roll transactions, which are included in "Realized loss on derivatives, net" on the consolidated statements of income (loss). EAD is adjusted to exclude outstanding LTIP-OP Units in the Company's Operating Partnership and dividends paid on the Company's preferred stock.

EAD is provided for purposes of potential comparability to other issuers that invest in residential mortgage-related assets. The Company believes providing investors with EAD, in addition to related GAAP financial measures, may provide investors some insight into the Company's ongoing operational performance. However, the concept of EAD does have significant limitations, including the exclusion of realized and unrealized gains (losses), and given the apparent lack of a consistent methodology among issuers for defining EAD, it may not be comparable to similarly titled

measures of other issuers, which define EAD differently from us and each other. As a result, EAD should not be considered a substitute for the Company's GAAP net income (loss) or as a measure of the Company's liquidity. While EAD is one indicia of the Company's earnings capacity, it is not the only factor considered in setting a dividend and is not the same as REIT taxable income which is calculated in accordance with the rules of the IRS.

The following table provides a reconciliation of net income to EAD for the three months ended March 31, 2022 and December 31, 2021:
