FORWARD-LOOKING INFORMATION

Cherry Hill Mortgage Investment Corporation (together with its consolidated subsidiaries, the “Company”, “we”, “our” or “us”) makes forward-looking statements in this Quarterly Report on Form 10-Q within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). For these statements, the Company claims the protections of the safe harbor for forward-looking statements contained in such Sections. Forward-looking statements are subject to substantial risks and uncertainties, many of which are difficult to predict and are generally beyond the Company’s control. These forward-looking statements include information about possible or assumed future results of the Company’s business, financial condition, liquidity, results of operations, plans and objectives. When the Company uses the words “believe,” “expect,” “anticipate,” “estimate,” “plan,” “continue,” “intend,” “should,” “could,” “would,” “may,” “potential” or the negative of these terms or other comparable terminology, the Company intends to identify forward-looking statements. Statements regarding the following subjects, among others, may be forward-looking:

- the Company’s investment objectives and business strategy;
- the Company’s ability to raise capital through the sale of its equity and debt securities;
- the Company’s ability to obtain future financing arrangements and refinance existing financing arrangements as they mature;
- the Company’s expected leverage;
- the Company’s expected investments;
- the Company’s ability to acquire mortgage servicing rights (“MSRs” or “Servicing Related Assets”);
- estimates or statements relating to, and the Company’s ability to make, future distributions;
- the Company’s ability to compete in the marketplace;
- market, industry and economic trends;
- recent market developments and actions taken and to be taken by the U.S. Government, the U.S. Treasury and the Board of Governors of the Federal Reserve System, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, the Government National Mortgage Association and the U.S. Securities and Exchange Commission (“SEC”);
- mortgage loan modification programs and future legislative actions;
- the Company’s ability to maintain its qualification as a real estate investment trust (“REIT”) under the Internal Revenue Code of 1986, as amended (the “Code”);
- the Company’s ability to maintain its exclusion from registration as an investment company under the Investment Company Act of 1940, as amended (the “Investment Company Act”);
- projected capital and operating expenditures;
- availability of investment opportunities in mortgage-related, real estate-related and other securities;
- availability of qualified personnel;

- prepayment rates; and
- projected default rates.

The Company's beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to it or are within its control. If any such change occurs, the Company's business, financial condition, liquidity and results of operations may vary materially from those expressed in, or implied by, the Company's forward-looking statements. These risks, along with, among others, the following factors, could cause actual results to vary from the Company's forward-looking statements:

- the factors discussed under "Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Quarterly Report on Form 10-Q and "Part I, Item 1A. Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2016;
- general volatility of the capital markets;
- changes in the Company's investment objectives and business strategy;
- availability, terms and deployment of capital;
- availability of suitable investment opportunities;
- the Company's dependence on its external manager, Cherry Hill Mortgage Management, LLC ("the Manager"), and the Company's ability to find a suitable replacement if the Company or the Manager were to terminate the management agreement the Company has entered into with the Manager;
- changes in the Company's assets, interest rates or the general economy;
- increased rates of default and/or decreased recovery rates on the Company's investments;
- changes in interest rates, interest rate spreads, the yield curve, prepayment rates or recapture rates;
- limitations on the Company's business due to compliance with requirements for maintaining its qualification as a REIT under the Code and its exclusion from registration as an investment company under the Investment Company Act; and
- the degree and nature of the Company's competition, including competition for its targeted assets.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, it cannot guarantee future results, levels of activity, performance or achievements. These forward-looking statements apply only as of the date of this Quarterly Report on Form 10-Q. The Company is not obligated, and does not intend, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Cherry Hill Mortgage Investment Corporation and Subsidiaries

Notes to Consolidated Financial Statements

March 31, 2017

(Unaudited)

Note 1 — Organization and Operations

Cherry Hill Mortgage Investment Corporation (together with its consolidated subsidiaries, the "Company") was organized in the state of Maryland on October 31, 2012 to invest in residential mortgage assets in the United States. Under the Company's charter, as of December 31, 2012, the Company was authorized to issue 1,000 shares of common stock. On June 6, 2013, the Company amended and restated its charter and increased its authorized capitalization. Accordingly, at December 31, 2013, the Company was authorized to issue up to 500,000,000 shares of common stock and 100,000,000 shares of preferred stock, each with a par value of $0.01 per share.

The accompanying interim consolidated financial statements include the accounts of the Company's subsidiaries, Cherry Hill Operating Partnership LP ("Operating Partnership"), Cherry Hill QRS I, LLC, Cherry Hill QRS II, LLC, Cherry Hill QRS III, LLC, CHMI Insurance Company, LLC ("CHMI Insurance"), CHMI Solutions, Inc. ("CHMI Solutions") and Aurora Financial Group, Inc. ("Aurora").

On October 9, 2013, the Company completed an initial public offering (the "IPO") and a concurrent private placement of its common stock. The Company did not conduct any activity prior to the IPO and the concurrent private placement. Substantially all of the net proceeds from the IPO and the concurrent private placement were used to invest in excess mortgage servicing rights on residential mortgage loans ("Excess MSRs") and residential mortgage-backed securities ("RMBS" or "securities"), the payment of principal and interest on which is guaranteed by a U.S. government agency or a U.S. government sponsored enterprise ("Agency RMBS").

On March 29, 2017, the Company issued and sold 5,175,000 shares of its common stock, par value $0.01 per share, raising approximately $81.1 million after underwriting discounts and commissions but before expenses of approximately $229,000. All of the net proceeds were used to invest in RMBS pending re-deployment of a substantial portion of those proceeds into the acquisition of MSRs.

The Company is party to a management agreement (the "Management Agreement") with Cherry Hill Mortgage Management, LLC (the "Manager"), a Delaware limited liability company established by Mr. Stanley Middleman. The Manager is a party to a Services Agreement with Freedom Mortgage Corporation ("Freedom Mortgage") which is owned and controlled by Mr. Middleman. The Manager is owned by a "blind trust" for the benefit of Mr. Middleman. For a further discussion of the Management Agreement, see Note 7.

The Company has elected to be taxed as a real estate investment trust ("REIT"), as defined under the Internal Revenue Code of 1986, as amended (the "Code"), commencing with its short taxable year ended December 31, 2013. As long as the Company continues to comply with a number of requirements under federal tax law and maintains its qualification as a REIT, the Company generally will not be subject to U.S. federal income taxes to the extent that the Company distributes its taxable income to its stockholders on an annual basis and does not engage in prohibited transactions. However, certain activities that the Company may perform may cause it to earn income that will not be qualifying income for REIT purposes.

Note 2 — Basis of Presentation and Significant Accounting Policies

Basis of Accounting

The accompanying interim consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 10 of Regulation S-X. The interim consolidated financial statements include the accounts of the Company and its consolidated subsidiaries. All significant intercompany transactions and balances have been eliminated. The Company consolidates those entities in which it has an investment of 50% or more and has control over significant operating, financial and investing decisions of the entity. The interim consolidated financial statements reflect all necessary and recurring adjustments for fair presentation of the results for the interim periods presented herein.

Emerging Growth Company Status

On April 5, 2012, the Jumpstart Our Business Startups Act (the "JOBS Act") was signed into law. The JOBS Act contains provisions that, among other things, reduce certain reporting requirements for qualifying public companies. Because the Company qualifies as an "emerging growth company," it may, under Section 7(a)(2)(B) of the Securities Act of 1933, delay adoption of new or revised accounting standards applicable to public companies until such standards would otherwise apply to private companies. The Company has elected to take advantage of this extended transition period until the first to occur of the date that it (i) is no longer an "emerging growth company" or (ii) affirmatively and irrevocably opts out of this extended transition period. As a result, the consolidated interim financial statements may not be comparable to those of other public companies that comply with such new or revised accounting standards. Until the date that the Company is no longer an "emerging growth company" or affirmatively and irrevocably opts out of the extended transition period, upon issuance of a new or revised accounting standard that applies to the consolidated interim financial statements and that has a different effective date for public and private companies, the Company will disclose the date on which adoption is required for non-emerging growth companies and the date on which it will adopt the recently issued accounting standard.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make a number of significant estimates and assumptions. These include estimates of fair value of Excess MSRs and MSRs (collectively, "Servicing Related Assets"), RMBS, derivatives and credit losses including the period of time during which the Company anticipates an increase in the fair values of securities sufficient to recover unrealized losses on those securities, and other estimates that affect the reported amounts of certain assets and liabilities and disclosure of contingent assets and liabilities as of the date of the interim consolidated financial statements and the reported amounts of certain revenues and expenses during the reporting period. It is likely that changes in these estimates (e.g., valuation changes due to supply and demand, credit performance, prepayments, interest rates, or other reasons) will occur in the near term. The Company's estimates are inherently subjective in nature. Actual results could differ from the Company's estimates and differences may be material.

Risks and Uncertainties

In the normal course of business, the Company encounters primarily two significant types of economic risk: credit and market. Credit risk is the risk of default on the Company's investments in RMBS, Servicing Related Assets and derivatives that results from a borrower's or derivative counterparty's inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of investments in RMBS, Servicing Related Assets and derivatives due to changes in interest rates, spreads or other market factors, including prepayment speeds on the Company's RMBS and Servicing Related Assets. The Company is subject to the risks involved with real estate and real estate-related debt instruments. These include, among others, the risks normally associated with changes in the general economic climate, changes in the mortgage market, changes in tax laws, interest rate levels, and the availability of financing.

The Company also is subject to significant tax risks. If the Company were to fail to qualify as a REIT in any taxable year, the Company would be subject to U.S. federal income tax on its REIT income (including any applicable alternative minimum tax), which could be material. Unless entitled to relief under certain statutory provisions, the Company would also be disqualified from treatment as a REIT for the four taxable years following the year during which qualification is lost.

Investments in RMBS

Classification – The Company classifies its investments in RMBS as securities available for sale. Although the Company generally intends to hold most of its securities until maturity, it may, from time to time, sell any of its securities as part of its overall management of its portfolio. Securities available for sale are carried at fair value with the net unrealized gains or losses reported as a separate component of accumulated other comprehensive income (loss), to the extent impairment losses, if any, are considered temporary. Unrealized losses on securities are charged to earnings if they reflect a decline in value that is other-than-temporary, as described below.

Fair value is determined under the guidance of Accounting Standards Codification ("ASC") 820, *Fair Value Measurements and Disclosures* ("ASC 820"). The Company determines fair value of its RMBS investments based upon prices obtained from third-party pricing providers. The third-party pricing providers use pricing models that generally incorporate such factors as coupons, primary and secondary mortgage rates, rate reset period, issuer, prepayment speeds, credit enhancements and expected life of the security. In determining the fair value of RMBS, management's judgment is used to arrive at fair value that considers prices obtained from third-party pricing providers and other applicable market data. The Company's application of ASC 820 guidance is discussed in further detail in Note 9.

Investment securities transactions are recorded on the trade date. At disposition, the net realized gain or loss is determined on the basis of the cost of the specific investment and is included in earnings. Approximately $257.8 million in Agency RMBS purchased, but not yet settled, was payable at March 31, 2017. All RMBS sold in the three month period ended March 31, 2017 were settled prior to period-end. Approximately $6.2 million in Agency RMBS purchased, but not yet settled, was payable at December 31, 2016. All RMBS sold in the year ended December 31, 2016 were settled prior to year-end.

Revenue Recognition **–** Interest income from coupon payments is accrued based on the outstanding principal amount of the RMBS and their contractual terms. Premiums and discounts associated with the purchase of the RMBS are accreted into interest income over the projected lives of the securities using the effective interest method. The Company's policy for estimating prepayment speeds for calculating the effective yield is to evaluate historical performance, consensus on prepayment speeds, and current market conditions. Adjustments are made for actual prepayment activity. Approximately $2.7 million and $2.0 million in interest income was receivable at March 31, 2017 and December 31, 2016, respectively, and has been classified within "Receivables and other assets" on the consolidated balance sheets. For further discussion on Receivables and other assets, see Note 13.

Impairment **–** The Company evaluates its RMBS, on a quarterly basis, to assess whether a decline in the fair value below the amortized cost basis is an other-than-temporary impairment ("OTTI"). The presence of OTTI is based upon a fair value decline below a security's amortized cost basis and a corresponding adverse change in expected cash flows due to credit related factors as well as non-credit factors, such as changes in interest rates and market spreads. Impairment is considered other-than-temporary if an entity (i) intends to sell the security, (ii) will more likely than not be required to sell the security before it recovers in value, or (iii) does not expect to recover the security's amortized cost basis, even if the entity does not intend to sell the security. Under these scenarios, the impairment is other-than-temporary and the full amount of impairment should be recognized currently in earnings and the cost basis of the security is adjusted. However, if an entity does not intend to sell the impaired security and it is more likely than not that it will not be required to sell before recovery, the OTTI should be separated into (i) the estimated amount relating to credit loss, or the credit component, and (ii) the amount relating to all other factors, or the non-credit component. Only the estimated credit loss amount is recognized currently in earnings, with the remainder of the loss recognized in other comprehensive income. The difference between the new amortized cost basis and the cash flows expected to be collected is accreted into interest income in accordance with the effective interest method. The Company did not record any OTTI charges during the three month period ended March 31, 2017. There were approximately $173,000 of OTTI during the year ended December 31, 2016 and have been classified within "Realized gain (loss) on RMBS, net" on the consolidated statements of income.

Investments in Excess MSRs

Classification – The Company has elected the fair value option to record its investments in Excess MSRs in order to provide users of the consolidated interim financial statements with better information regarding the effects of prepayment risk and other market factors on the Excess MSRs. Under this election, the Company records a valuation adjustment on its investments in Excess MSRs on a quarterly basis to recognize the changes in fair value in net income as described below. In determining the valuation of Excess MSRs, management uses internally developed models that are primarily based on observable market-based inputs but which also include unobservable market data inputs (see Note 9).

Revenue Recognition – Excess MSRs are aggregated into pools as applicable. Each pool of Excess MSRs is accounted for in the aggregate. Interest income for Excess MSRs is accreted into interest income on an effective yield or "interest" method, based upon the expected excess mortgage servicing amount over the expected life of the underlying mortgages. Changes to expected cash flows result in a cumulative retrospective adjustment, which will be recorded in the period in which the change in expected cash flows occurs. Under the retrospective method, the interest income recognized for a reporting period would be measured as the difference between the amortized cost basis at the end of the period and the amortized cost basis at the beginning of the period, plus any cash received during the period. The amortized cost basis is calculated as the present value of estimated future cash flows using an effective yield, which is the yield that equates all past actual and current estimated future cash flows to the initial investment. The difference between the fair value of Excess MSRs and their amortized cost basis is recorded on the consolidated statements of income statement as "Unrealized gain (loss) on investments in Excess MSRs." Fair value is generally determined by discounting the expected future cash flows using discount rates that incorporate the market risks and liquidity premium specific to the Excess MSRs and, therefore, may differ from their effective yields. The sale of investments in Excess MSRs are recognized upon settlement date. Approximately $2.0 million and $5.6 million in Excess MSR cash flow was receivable at March 31, 2017 and December 31, 2016, respectively, and has been classified within "Receivables and other assets" on the consolidated balance sheets.

In connection with the sale of its Excess MSRs, the Company elected a settlement date accounting policy to account for the gain on sale from that transaction. For a further discussion of the Company's sale of its Excess MSRs, see Note 7.

Investments in MSRs

Classification – MSRs include rights associated with servicing contracts acquired in connection with the Company's acquisition of Aurora on May 29, 2015 and MSRs acquired through bulk purchases of such rights from third parties. At initial recognition, the fair value of MSRs is established using assumptions consistent with those used to establish the fair value of existing MSRs. The Company has elected the fair value option to record its investments in MSRs in order to provide users of the consolidated interim financial statements with better information regarding the effects of prepayment risk and other market factors on the MSRs. Under this election, the Company records a valuation adjustment on its investments in MSRs on a quarterly basis to recognize the changes in fair value in net income as described below. The Company's MSRs represent the right to service mortgage loans. As an owner and manager of MSRs, the Company may be obligated to fund advances of principal and interest payments due to third-party owners of the loans, but not yet received from the individual borrowers. These advances are reported as servicing advances within the "Receivables and other assets" line item on the consolidated balance sheets. MSRs are reported at fair value on the consolidated balance sheets. Although transactions in MSRs are observable in the marketplace, the valuation includes unobservable market data inputs (prepayment speeds, delinquency levels, costs to service and discount rates). Changes in the fair value of MSRs as well as servicing fee income and servicing expenses are reported on the consolidated statements of income. In determining the valuation of MSRs, management uses internally developed models that are primarily based on observable market-based inputs but which also include unobservable market data inputs (see Note 9). For reporting purposes, conventional conforming loans are aggregated into one category.

Revenue Recognition – Mortgage servicing fee income represents revenue earned for servicing mortgage loans. The servicing fees are based on a contractual percentage of the outstanding principal balance and recognized as revenue as the related mortgage payments are collected. Corresponding costs to service are charged to expense as incurred. Approximately $3.1 million and $1.4 million in reimbursable servicing advances were receivable at March 31, 2017 and December 31, 2016, respectively, and have been classified within "Receivables and other assets" on the consolidated balance sheets. Although advances on Federal National Mortgage Association ("Fannie Mae") and Federal Home Loan Mortgage Corporation ("Freddie Mac") MSRs made in accordance with the relevant guidelines are recoverable, the recoverability of similar advances made on Government National Mortgage Association ("Ginnie Mae") MSRs may be limited under the rules and regulations of the U.S. Department of Housing and Urban Development, the Department of Veterans Affairs (the "VA") and the Federal Housing Administration ("FHA"). Because the Ginnie Mae MSRs were only acquired in February 2017, and advances on the Fannie Mae and Freddie Mac MSRs are expected to be recoverable, the Company has determined that no reserves for unrecoverable advances are necessary at March 31, 2017 and December 31, 2016. For further discussion on Receivables and other assets, see Note 13.

Servicing fee income received and servicing expenses incurred are reported on the consolidated statements of comprehensive income. The difference between the fair value of MSRs and their amortized cost basis is recorded on the consolidated statements of income as “Unrealized gain (loss) on investments in MSRs.” Fair value is generally determined by discounting the expected future cash flows using discount rates that incorporate the market risks and liquidity premium specific to the MSRs and, therefore, may differ from their effective yields.

As a result of the Company’s investments in MSRs, it is obligated from time to time to repurchase an underlying loan from the applicable agency for which it is being serviced due to an alleged breach of a representation or warranty. Loans acquired in this manner are recorded at the purchase price less any principal recoveries and are then offered for sale in the scratch and dent market. There were no loans purchased in the three month period ended March 31, 2017. In the year ended December 31, 2016, the Company purchased five loans, with an aggregate unpaid principal balance (“UPB”) of approximately $1.64 million at the time of purchase, as required by the applicable agency. Four of those loans were sold during the quarter ended March 31, 2017, and the Company did not recognize a loss on such sales.

Derivatives and Hedging Activities

Derivative transactions include swaps, swaptions, Treasury futures and “to-be-announced” securities (“TBAs”). Swaps and swaptions are entered into by the Company solely for interest rate risk management purposes. TBAs and Treasury futures are used for duration risk and basis risk management purposes. The decision whether or not a given transaction/position (or portion thereof) is economically hedged is made on a case-by-case basis, based on the risks involved and other factors as determined by senior management, including restrictions imposed by the Code on REITs. In determining whether to economically hedge a risk, the Company may consider whether other assets, liabilities, firm commitments and anticipated transactions already offset or reduce the risk. All transactions undertaken as economic hedges are entered into with a view towards minimizing the potential for economic losses that could be incurred by the Company. Generally, derivatives entered into are not intended to qualify as hedges under GAAP, unless specifically stated otherwise.

The Company’s derivative financial instruments contain credit risk to the extent that its bank counterparties may be unable to meet the terms of the agreements. The Company reduces such risk by limiting its counterparties to major financial institutions. In addition, the potential risk of loss with any one party resulting from this type of credit risk is monitored. Finally, the Company’s interest rate swaps are required to be cleared on an exchange, which further mitigates, but does not eliminate, credit risk. Management does not expect any material losses as a result of default by other parties to its derivative financial instruments.

Classification – All derivatives are recognized as either assets or liabilities on the consolidated balance sheets and measured at fair value. Due to the nature of these instruments, they may be in a receivable/asset position or a payable/liability position at the end of an accounting period. Derivative amounts payable to, and receivable from, the same party under a contract may be offset as long as the following conditions are met: (i) each of the two parties owes the other determinable amounts; (ii) the reporting party has the right to offset the amount owed with the amount owed by the other party; (iii) the reporting party intends to offset; and (iv) the right to offset is enforceable by law. The Company reports the fair value of derivative instruments gross of cash paid or received pursuant to credit support agreements, and fair value may be reflected on a net counterparty basis when the Company believes a legal right of offset exists under an enforceable master netting agreement. For further discussion on offsetting assets and liabilities, see Note 8.

Revenue Recognition – With respect to derivatives that have not been designated as hedges, any net payments under, or fluctuations in the fair value of, such derivatives have been recognized currently in “Realized and unrealized gains (losses) on derivatives, net” in the consolidated statements of income.

Cash and Cash Equivalents and Restricted Cash

The Company considers all highly liquid short-term investments with maturities of 90 days or less when purchased to be cash equivalents. Substantially all amounts on deposit with major financial institutions exceed insured limits. Restricted cash represents the Company's cash held by counterparties (i) as collateral against the Company's derivatives (approximately $1.2 million and $1.1 million at March 31, 2017 and December 31, 2016, respectively), (ii) as collateral for borrowings under its repurchase agreements (approximately $5.9 million and $20.4 million at March 31, 2017 and December 31, 2016, respectively) and (iii) as collateral for outstanding borrowings on a $25 million term loan secured by a pledge of the Company's existing portfolio of Excess MSRs (none at March 31, 2017 and approximately $1.1 million at December 31, 2016). For further information on the restricted cash as it relates to the term loan, see Note 12.

Due to Affiliates

This represents amounts due to the Manager pursuant to the Management Agreement. For further information on the Management Agreement, see Note 7.

Income Taxes

The Company elected to be taxed as a REIT under the Code commencing with its short taxable year ended December 31, 2013. The Company expects to continue to qualify to be treated as a REIT. As long as the Company qualifies as a REIT, the Company generally will not be subject to U.S. federal income taxes on its taxable income to the extent it annually distributes at least 90% of its REIT taxable income to stockholders and does not engage in prohibited transactions. The Company's taxable REIT subsidiaries ("TRSs"), CHMI Solutions and Aurora, are subject to U.S. federal income taxes on their taxable income.

The Company accounts for income taxes in accordance with ASC 740, *Income Taxes*. ASC 740 requires the recording of deferred income taxes that reflect the net tax effect of temporary differences between the carrying amounts of the Company's assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, including operating loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in earnings in the period that includes the enactment date. The Company assesses its tax positions for all open tax years and determines if it has any material unrecognized liabilities in accordance with ASC 740. The Company records these liabilities to the extent it deems them more-likely-than-not to be incurred. The Company records interest and penalties related to income taxes within the provision for income taxes in the consolidated statements of income (loss). The Company has not incurred any interest or penalties.

Realized Gain (Loss) on Investments, Net

The following table presents gains and losses on sales of the specified categories of investments for the periods indicated (dollars in thousands):

	Three Months Ended March 31,	
	2017	**2016**
Realized gain (loss) on RMBS, net		
Gain on RMBS	$ -	$ 320
Loss on RMBS	(256)	-
Net realized gain (loss) on RMBS	(256)	320
Realized gain (loss) on derivatives, net	(1,017)	(1,461)
Unrealized gain (loss) on derivatives, net	1,082	(5,198)
Realized gain (loss) on Excess MSRs, net	6,678	-
Unrealized gain (loss) on Excess MSRs, net	-	(2,307)
Unrealized gain (loss) on MSRs, net	12,312	(2,232)
Total	**$ 18,799**	**$ (10,878)**

Repurchase Agreements and Interest Expense

The Company finances its investments in RMBS with short-term borrowings under master repurchase agreements. The repurchase agreements are generally short-term debt, which expire within one year. Borrowings under repurchase agreements generally bear interest rates of a specified margin over one-month LIBOR and are generally uncommitted. The repurchase agreements are treated as collateralized financing transactions and are carried at their contractual amounts, as specified in the respective agreements. Interest is recorded at the contractual amount on an accrual basis.

Dividends Payable

Because the Company is organized and operated as a REIT under the Code, it is required by law to distribute annually at least 90% of its REIT taxable income, which it does in the form of quarterly and special dividend payments. The Company accrues the dividend payable on the accounting date, which causes an offsetting reduction in retained earnings.

Comprehensive Income

Comprehensive income is defined as the change in equity of a business enterprise during a period resulting from transactions and other events and circumstances, excluding those resulting from investments by and distributions to owners. For the Company’s purposes, comprehensive income represents net income, as presented in the consolidated statements of income, adjusted for unrealized gains or losses on RMBS, which are designated as available for sale.

Business Combinations

Business combinations are accounted for under the acquisition method of accounting in accordance with ASC 805, *Business Combinations* (“ASC 805”). Under the acquisition method, the acquiring entity in a business combination recognizes 100 percent of the acquired assets and assumed liabilities, regardless of the percentage owned, at their estimated fair values as of the date of acquisition. Any excess of the purchase price over the fair value of net assets and other identifiable intangible assets acquired is recorded as goodwill. To the extent the fair value of net assets acquired, including other identifiable assets, exceeds the purchase price, a bargain purchase gain is recognized. Assets acquired and liabilities assumed from contingencies must also be recognized at fair value, if the fair value can be determined during the measurement period. Results of operations of an acquired business are included in the consolidated statements of income (loss) from the date of acquisition. Acquisition-related costs, including conversion and restructuring charges, are expensed as incurred. The Company applied this guidance to the Aurora acquisition that occurred in 2015.

Recent Accounting Pronouncements

Revenue Recognition – In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-09, *Revenue from Contracts with Customers*, which supersedes the revenue recognition requirements in ASC 606, *Revenue Recognition*, and most industry-specific guidance throughout the Industry Topics of the Codification. Under the new revenue recognition guidance, entities are required to identify the contract with a customer, identify the performance obligations in the contract, determine the transaction price, allocate the transaction price to the performance obligations in the contract and recognize revenue when the entity satisfies a performance obligation. In April 2015, the FASB voted for a one-year deferral of the effective date, resulting in this new guidance being effective for annual reporting periods, and interim periods within those annual periods, beginning after December 15, 2017. Subsequent to the initial issuance, the FASB has continued to issue updates to this guidance to provide additional clarification and implementation instructions to issuers regarding (i) principal versus agent considerations, (ii) identifying performance obligations, (iii) licensing, and (iv) narrow-scope improvements and practical expedients relating to assessing collectability, presentation of sales taxes, non-cash consideration, and completed contracts and contract modifications at transition. The Company has reviewed the scope of the guidance and monitored the determinations of the FASB Transition Resource Group and concluded that a number of the Company's most significant revenue streams are not within the scope of the standard because the standard does not apply to revenue on contracts accounted for under the transfers and servicing of financial assets or financial instruments standards. Therefore, revenue recognition for these contracts will remain unchanged. Further, the FASB has issued, and may issue in the future, interpretive guidance that may cause the Company’s evaluation to change. However, the Company continues to evaluate certain select revenue streams for the effect that this guidance will have on its consolidated financial statements. The Company is also still assessing the standard’s new disclosure requirements. The Company has not yet selected a transition method.

Business Combinations − In September 2015, the FASB issued ASU 2015-16, *Simplifying the Accounting for Measurement-Period Adjustments*, which amends ASC 805, *Business Combinations*. ASU 2015-16 provides updated guidance regarding simplifying the accounting for recognizing adjustments to provisional amounts identified during the measurement period in a business combination. To simplify the accounting for these adjustments, the amendments in this update eliminate the requirement to retrospectively account for the adjustments and to recognize them in the period that they are identified. This guidance was effective for the Company beginning January 1, 2016. The adoption of this guidance did not have a significant impact on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations,* an accounting standards update that amends the guidance on business combinations. The update clarifies the definition of a business and provides a framework that gives entities a basis for making reasonable judgments about whether a transaction should be accounted for as an acquisition of assets or a business. This guidance is effective for annual reporting periods, and interim periods within those annual periods, beginning after December 15, 2017. The Company will apply this guidance to its assessment of applicable transactions, such as acquisitions and disposals of assets or businesses, consummated after the adoption date.

Leases −In February 2016, the FASB issued ASU 2016-02, *Leases*, an accounting standards update that requires the recognition of lease assets and lease liabilities by lessees for those leases classified as operating leases under previous GAAP. A lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset to not recognize lease assets and lease liabilities. In transition, lessees are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach, which includes a number of optional practical expedients that entities may elect to apply. This guidance is effective for fiscal years beginning after December 15, 2018, with early application permitted. While the Company is currently evaluating the effect that this guidance will have on its consolidated financial statements, it will result in the recognition of certain operating leases as right-of-use assets and lease liabilities on the consolidated balance sheets. The Company currently has no commitments under noncancelable operating leases.

Credit Losses − In June 2016, the FASB issued ASU 2016-13, *Financial Instruments—Credit Losses*, an accounting standards update that changes the impairment model for most financial assets and certain other instruments. Allowances for credit losses on Available-for-Sale debt securities will be recognized, rather than direct reductions in the amortized cost of the investments. The new model also requires the estimation of lifetime expected credit losses and corresponding recognition of allowance for losses on trade and other receivables, held-to-maturity debt securities, loans, and other instruments held at amortized cost. This guidance requires certain recurring disclosures and is effective for annual periods, and interim periods within those annual periods, beginning on or after December 15, 2019, with early adoption permitted for annual periods, and interim periods within those annual periods, beginning on or after December 15, 2018. The Company is evaluating the adoption of this ASU.

Statement of Cash Flows − In August 2016, the FASB issued ASU 2016-15, *Classification of Certain Cash Receipts and Cash Payments*, an accounting standards update that amends the guidance on the classification of certain cash receipts and cash payments presented within the statement of cash flows to reduce the existing diversity in practice. This guidance is effective for annual reporting periods, and interim periods within those annual periods, beginning after December 15, 2017, with early adoption permitted. The Company is currently evaluating the effect that this guidance will have on its consolidated financial statements.

Income Taxes − In October 2016, the FASB issued ASU 2016-16, *Income Taxes*, an accounting standards update that amends the guidance on the classification of income taxes related to the intra-entity transfer of assets other than inventory. This guidance is effective for annual reporting periods, and interim periods within those annual periods, beginning after December 15, 2017, with early adoption permitted. The Company is currently evaluating the effect that this guidance will have on its consolidated financial statements. However, the significance of adoption is dependent on the nature of the transactions and corresponding tax laws in effect at the time of adoption.

Restricted Cash − In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows*, an accounting standards update that amends the guidance on restricted cash within the statement of cash flows. The update amends the classification of restricted cash and cash equivalents to be included within cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts. This guidance is effective for annual reporting periods, and interim periods within those annual periods, beginning after December 15, 2017, with early adoption permitted. The adoption will impact the presentation of the cash flows, but will not otherwise have a material impact on the consolidated results of operations or financial condition.

Changes in Presentation

Certain prior period amounts have been reclassified to conform to current period presentation.

Note 3 — Segment Reporting

The Company conducts its business through the following segments: (i) investments in RMBS; (ii) investments in Servicing Related Assets; and (iii) "All Other" which consists primarily of general and administrative expenses, including fees paid to the Company's directors and management fees paid to the Manager pursuant to the Management Agreement (See Note 7). For segment reporting purposes, the Company does not allocate interest income on short-term investments or general and administrative expenses.

Summary financial data on the Company's segments is given below, together with a reconciliation to the same data for the Company as a whole (dollars in thousands):

	Servicing Related Assets	RMBS	All Other	Total
Three Months Ended March 31, 2017				
Interest income	$ 523	$ 5,555	$ -	$ 6,078
Interest expense	114	2,317	-	2,431
Net interest income	409	3,238	-	3,647
Servicing fee income	4,574	-	-	4,574
Servicing costs	1,227	-	-	1,227
Net servicing income	3,347	-	-	3,347
Other income	18,990	(191)	-	18,799
Other operating expenses	-	-	1,867	1,867
Provision for corporate business taxes	1,339	-	-	1,339
Net income (loss)	$ 21,407	$ 3,047	$ (1,867)	$ 22,587
Three Months Ended March 31, 2016				
Interest income	$ 1,444	$ 3,744	$ -	$ 5,188
Interest expense	340	1,317	-	1,657
Net interest income	1,104	2,427	-	3,531
Servicing fee income	1,495	-	-	1,495
Servicing costs	402	-	-	402
Net servicing income	1,093	-	-	1,093
Other income	(4,539)	(6,339)	-	(10,878)
Other operating expenses	-	-	1,498	1,498
Provision for corporate business taxes	(590)	-	-	(590)
Net income (loss)	$ (1,752)	$ (3,912)	$ (1,498)	$ (7,162)

Balance Sheet				
March 31, 2017				
Investments	$ 76,698	$ 1,139,056	$ -	$ 1,215,754
Other assets	6,446	22,517	73,062	102,025
Total assets	83,144	1,161,573	73,062	1,317,779
Debt	16,000	773,317	-	789,317
Other liabilities	3,506	259,460	7,956	270,922
Total liabilities	19,506	1,032,777	7,956	1,060,239
GAAP book value	$ 63,638	$ 128,796	$ 65,106	$ 257,540
December 31, 2016				
Investments	$ 61,263	$ 671,904	$ -	$ 733,167
Other assets	8,826	32,495	18,390	59,711
Total assets	70,089	704,399	18,390	792,878
Debt	22,886	594,615	-	617,501
Other liabilities	2,481	9,490	7,397	19,368
Total liabilities	25,367	604,105	7,397	636,869
GAAP book value	$ 44,722	$ 100,294	$ 10,993	$ 156,009

Note 4 — Investments in RMBS

All of the Company's RMBS are classified as available for sale and are, therefore, reported at fair value with changes in fair value recorded in other comprehensive income except for securities that are OTTI (dollars in thousands):

Summary of RMBS Assets

As of March 31, 2017

	Original		Gross Unrealized			Number	Weighted Average			
Asset Type	**Face Value**	**Book Value**	**Gains**	**Losses**	**Carrying Value(A)**	**of Securities**	**Rating**	**Coupon**	**Yield(C)**	**Maturity (Years)(D)**
RMBS										
Fannie Mae	$ 772,819	$ 732,675	$ 1,766	$ (6,174)	$ 728,267	101	(B)	3.78%	3.56%	25
Freddie Mac	389,576	371,377	1,063	(2,789)	369,651	45	(B)	3.77%	3.52%	26
CMOs	50,375	39,725	1,497	(84)	41,138	12	Unrated	4.47%	5.10%	12

As of December 31, 2016

	Original		Gross Unrealized			Number	Weighted Average			
Asset Type	**Face Value**	**Book Value**	**Gains**	**Losses**	**Carrying Value(A)**	**of Securities**	**Rating**	**Coupon**	**Yield(C)**	**Maturity (Years)(D)**
RMBS										
Fannie Mae	$ 493,645	$ 454,012	$ 1,517	$ (6,592)	$ 448,937	68	(B)	3.74%	3.52%	24
Freddie Mac	222,469	200,207	587	(2,691)	198,103	27	(B)	3.62%	3.44%	26
CMOs	34,596	24,086	857	(79)	24,864	9	Unrated	4.78%	4.24%	12
Total/Weighted Average	**$ 750,710**	**$ 678,305**	**$ 2,961**	**$ (9,362)**	**$ 671,904**	**104**		**3.74%**	**3.53%**	**24**

(A) See Note 9 regarding the estimation of fair value, which approximates carrying value for all securities.

(B) The Company used an implied AAA rating for the Fannie Mae and Freddie Mac securities, other than collateralized mortgage obligations, which are unrated.

(C) The weighted average yield is based on the most recent annualized monthly interest income, divided by the book value of settled securities. Prior period amounts have been reclassified to conform to current period presentation.

(D) The weighted average stated maturity.

Summary of RMBS Assets by Maturity

As of March 31, 2017

Years to Maturity	Original Face Value	Book Value	Gross Unrealized Gains	Gross Unrealized Losses	Carrying Value(A)	Number of Securities	Weighted Average Rating	Weighted Average Coupon	Weighted Average Yield(C)	Weighted Average Maturity (Years)(D)

(A) See Note 9 regarding the estimation of fair value, which approximates carrying value for all securities.

(B) The Company used an implied AAA rating for the Fannie Mae and Freddie Mac securities, other than collateralized mortgage obligations, which are unrated.

(C) The weighted average yield is based on the most recent annualized monthly interest income, divided by the book value of settled securities. Prior period amounts have been reclassified to conform to current period presentation.

(D) The weighted average stated maturity.

At March 31, 2017 and December 31, 2016, the Company pledged Agency RMBS investments with a carrying value of approximately $812.3 million and $608.6 million, respectively, as collateral for repurchase agreements. At March 31, 2017 and December 31, 2016, the Company did not have any securities purchased from and financed with the same counterparty that did not meet the conditions of ASC 860, *Transfers and Servicing*, to be considered linked transactions and, therefore, classified as derivatives.

Unrealized losses that are considered other-than-temporary are recognized currently in earnings. Based on management's analysis of these securities, the performance of the underlying loans and changes in market factors, management determined that unrealized losses as of the balance sheet date on the Company's securities were primarily the result of changes in market factors, rather than issuer-specific credit impairment. The Company performed analyses in relation to such securities, using management's best estimate of their cash flows, which support its belief that the carrying values of such securities were fully recoverable over their expected holding period. Such market factors include changes in market interest rates and credit spreads, or certain macroeconomic events, which did not directly impact the Company's ability to collect amounts contractually due. Management continually evaluates the credit status of each of the Company's securities and the collateral supporting those securities. This evaluation includes a review of the credit of the issuer of the security (if applicable), the credit rating of the security (if applicable), the key terms of the security (including credit support), debt service coverage and loan to value ratios, the performance of the pool of underlying loans and the estimated value of the collateral supporting such loans, including the effect of local, industry and broader economic trends and factors. Significant judgment is required in this analysis. In connection with the above, the Company weighs the fact that all of its investments in Agency RMBS are guaranteed by U.S. government agencies or U.S. government sponsored entities.

The Company did not record any OTTI during the three month period ended March 31, 2017. There was approximately $173,000 of OTTI during the year ended December 31, 2016.

The following tables summarize the Company's securities in an unrealized loss position as of the dates indicated (dollars in thousands):

RMBS Unrealized Loss Positions

As of March 31, 2017

Duration in Loss Position	Original Face Value	Book Value	Gross Unrealized Losses	Carrying Value(A)	Number of Securities	Weighted Average Rating	Weighted Average Coupon	Weighted Average Yield(C)	Weighted Average Maturity (Years)(D)
Less than Twelve Months	$ 371,708	$ 364,658	$ (6,387)	$ 358,271	49	(B)	3.78%	3.54%	27
Twelve or More Months	264,515	227,513	(2,660)	224,853	37	(B)	3.60%	3.49%	23
Total/Weighted Average	**$ 636,223**	**$ 592,171**	**$ (9,047)**	**$ 583,124**	**86**		**3.71%**	**3.52%**	**26**

As of December 31, 2016

Duration in Loss Position	Original Face Value	Book Value	Gross Unrealized Losses	Carrying Value(A)	Number of Securities	Weighted Average Rating	Weighted Average Coupon	Weighted Average Yield(C)	Weighted Average Maturity (Years)(D)
Less than Twelve Months	$ 494,847	$ 476,129	$ (9,362)	$ 466,767	68	(B)	3.65%	3.40%	25
Total/Weighted Average	**$ 494,847**	**$ 476,129**	**$ (9,362)**	**$ 466,767**	**68**		**3.65%**	**3.40%**	**25**

(A) See Note 9 regarding the estimation of fair value, which approximates carrying value for all securities.

(B) The Company used an implied AAA rating for the Fannie Mae and Freddie Mac securities, other than collateralized mortgage obligations, which are unrated.

(C) The weighted average yield is based on the most recent annualized monthly interest income, divided by the book value of settled securities. Prior period amounts have been reclassified to conform to current period presentation.

(D) The weighted average stated maturity. Except for the security for which the Company has recognized OTTI, the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases which may be maturity.

Note 5 — Investments in Servicing Related Assets

Excess MSRs

In October 2013, the Company entered into an agreement ("Excess MSR Agreement 1") with Freedom Mortgage to invest in Excess MSRs with Freedom Mortgage. Freedom Mortgage originated the mortgage servicing rights on the related pool of residential fixed rate Ginnie Mae-eligible FHA and VA mortgage loans with an aggregate UPB of approximately $10.0 billion ("Excess MSR Pool 1"). Freedom Mortgage was entitled to receive an initial weighted average total mortgage servicing amount of approximately 28 basis points ("bps") on the performing UPB, as well as any ancillary income from Excess MSR Pool 1. Pursuant to Excess MSR Agreement 1, Freedom Mortgage performed all servicing functions and advancing functions related to Excess MSR Pool 1 for a basic fee (the amount representing reasonable compensation for performing the servicing duties) of 8 bps. The remainder, or "excess mortgage servicing amount," was initially equal to a weighted average of 20 bps.

Pursuant to Excess MSR Agreement 1, the Company acquired the right to receive 85% of the excess mortgage servicing amount on Excess MSR Pool 1 and, subject to certain limitations and pursuant to a recapture agreement (the "Excess MSR Pool 1—Recapture Agreement"), 85% of the Excess MSRs on future mortgage loans originated by Freedom Mortgage that represented refinancings of loans in Excess MSR Pool l (which loans then become part of Excess MSR Pool 1) for approximately $60.6 million. Freedom Mortgage co-invested, pari passu with the Company, in 15% of the Excess MSRs. Freedom Mortgage, as servicer, also retained the ancillary income and the servicing obligations and liabilities.

In October 2013, the Company entered into an agreement ("Excess MSR Agreement 2") with Freedom Mortgage to invest with Freedom Mortgage in another pool of Excess MSRs. Freedom Mortgage acquired the mortgage servicing rights from a third-party seller on a pool of residential Ginnie Mae-eligible VA hybrid adjustable rate mortgage loans with an outstanding aggregate principal balance of approximately $10.7 billion ("Excess MSR Pool 2"). Freedom Mortgage was entitled to receive an initial weighted average total mortgage servicing amount of 44 bps on the performing UPB, as well as any ancillary income from Excess MSR Pool 2. Pursuant to Excess MSR Agreement 2, Freedom Mortgage performed all servicing functions and advancing functions related to Excess MSR Pool 2 for a basic fee (the amount representing reasonable compensation for performing the servicing duties) of 10 bps. Therefore, the remainder, or "excess mortgage servicing amount" was initially equal to a weighted average of 34 bps.

Pursuant to Excess MSR Agreement 2, the Company acquired the right to receive 50% of the excess mortgage servicing amount on Excess MSR Pool 2 and, subject to certain limitations and pursuant to a recapture agreement (the "Excess MSR Pool 2—Recapture Agreement"), 50% of the Excess MSRs on future mortgage loans originated by Freedom Mortgage that represented refinancings of loans in Excess MSR Pool 2 (which loans then become part of Excess MSR Pool 2**)** for approximately $38.4 million. Freedom Mortgage co-invested, pari passu with the Company, in 50% of the Excess MSRs. Freedom Mortgage, as servicer, also retained the ancillary income and the servicing obligations and liabilities.

In October 2013, the Company also entered into a flow and bulk Excess MSR purchase agreement related to future purchases of Excess MSRs from Freedom Mortgage (the "Flow and Bulk Excess MSR Purchase Agreement"). On February 28, 2014, pursuant to the Flow and Bulk Excess MSR Purchase Agreement, the Company purchased from Freedom Mortgage Excess MSRs on mortgage loans originated by Freedom Mortgage during the first quarter of 2014 with an UPB of approximately $76.8 million. The Company acquired an approximate 85% interest in the Excess MSRs for approximately $567,000. The terms of the purchase included recapture provisions that were the same as those in the Excess MSR acquisition agreements the Company entered into with Freedom Mortgage in October 2013.

On March 31, 2014, pursuant to the Flow and Bulk Excess MSR Purchase Agreement, the Company purchased from Freedom Mortgage Excess MSRs on mortgage loans originated by a third party originator with an aggregate UPB of approximately $159.8 million. Freedom Mortgage purchased the MSRs on these mortgage loans from a third party on January 31, 2014. The Company acquired an approximate 71% interest in the Excess MSRs for approximately $946,000. The terms of the purchase included recapture provisions that were the same as those in the Excess MSR acquisition agreements the Company entered into with Freedom Mortgage in October 2013.

On June 30, 2014, pursuant to the Flow and Bulk Excess MSR purchase agreement, the Company purchased from Freedom Mortgage Excess MSRs on mortgage loans originated by Freedom Mortgage during the second quarter of 2014 with an aggregate UPB of approximately $98.1 million. The Company acquired an approximate 85% interest in the Excess MSRs for approximately $661,000. The terms of the purchase included recapture provisions that were the same as those in the Excess MSR acquisition agreements the Company entered into with Freedom Mortgage in October 2013.

The mortgage loans underlying the Excess MSRs purchased in 2014 are collectively referred to as "Excess MSR Pool 2014," and the recapture provisions, which are identical, are collectively referred to as the "Excess MSR Pool 2014—Recapture Agreement."

On November 15, 2016, the Company agreed to sell all of its Excess MSRs back to Freedom Mortgage. Excess MSR Pool 1 and Excess MSR Pool 2014 were sold on November 15, 2016, and Excess MSR Pool 2 was sold on February 1, 2017. Each of the Excess MSR purchase agreements was terminated at the time the related pool(s) of Excess MSRs were sold. See Note 7.

Table of Contents

MSRs

On May 29, 2015, in conjunction with the acquisition of Aurora, the Company acquired MSRs on conventional mortgage loans with an aggregate UPB of approximately $718.4 million.

On June 10, 2015, the Company agreed to transfer the direct servicing of the MSR portfolio to Freedom Mortgage pursuant to a subservicing agreement with Freedom Mortgage. The transfer occurred in September 2015. Pending the transfer, the former servicing employees of Aurora, now employees of Freedom Mortgage, directly serviced the portfolio for Aurora. The servicing was provided at cost pursuant to the Management Agreement with the Manager and the Services Agreement between the Manager and Freedom Mortgage. The cost for such services was included in servicing costs on the consolidated statements of income (loss).

Aurora subsequently acquired from third parties three portfolios of MSRs on loans owned or securitized by Fannie Mae or Freddie Mac with an aggregate UPB of approximately $3.1 billion as of their respective closing dates.

In June 2016, Aurora entered into a joint marketing recapture agreement with Freedom Mortgage. Pursuant to this agreement, Freedom Mortgage will attempt to refinance certain mortgage loans underlying Aurora's MSR portfolio as directed by Aurora. See Note 7.

See Note 7 for a description of the Company's acquisition of MSRs from Freedom Mortgage in connection with the sale by the Company of its Excess MSRs.

The following is a summary of the Company's Servicing Related Assets (dollars in thousands):

Servicing Related Assets Summary

As of March 31, 2017

	Unpaid Principal Balance	Cost Basis	Carrying Value[(A)]	Weighted Average Coupon	Weighted Average Maturity (Years)[(B)]	Changes in Fair Value Recorded in Other Income (Loss)[(C)]
MSRs						
Conventional	$ 3,170,673	$ 31,871[(D)]	$ 31,088	3.81%	23.5	(783)
Government	4,421,039	32,515[(D)]	45,610	3.36%	28.5	13,095
Total	**$ 7,591,712**	**$ 64,386**	**$ 76,698**	3.55%	26.4	**$ 12,312**

As of December 31, 2016

	Unpaid Principal Balance	Cost Basis	Carrying Value[(A)]	Weighted Average Coupon	Weighted Average Maturity (Years)[(B)]	Changes in Fair Value Recorded in Other Income (Loss)[(C)]
Excess MSR Pool 2	6,053,142	19,754[(E)]	28,526	2.96%	26.3	(493)
Excess MSR Pool 2 - Recapture Agreement	-	1,187[(E)]	866		-	742
Conventional MSRs	3,262,181	35,156[(D)]	31,871	3.81%	23.7	(3,285)
Total	**$ 9,315,323**	**$ 56,097**	**$ 61,263**	3.26%	25.4	**$ (3,036)**

(A) Carrying value represents the fair value of the pools or recapture agreements, as applicable (see Note 9).
(B) The weighted average maturity represents the weighted average expected timing of the receipt of cash flows of each investment.
(C) The portion of the change in fair value of the recapture agreement relating to loans recaptured as of March 31, 2017 and December 31, 2016 is reflected in the respective pool.
(D) MSR cost basis consists of the carrying value of the prior period, adjusted for any purchases, sales and principal paydowns.
(E) The amortized cost basis of the recapture agreements is determined based on the relative fair values of the recapture agreements and related Excess MSRs at the time they were acquired.

The tables below summarize the geographic distribution for the states representing 5% or greater of the underlying residential mortgage loans of the Servicing Related Assets:

Geographic Concentration of Servicing Related Assets

As of March 31, 2017

	Percentage of Total Outstanding Unpaid Principal Balance
California	12.4%
New Jersey	8.2%
Texas	5.6%
Utah	5.5%
Florida	5.1%
All other	63.2%
Total	100.0%

As of December 31, 2016

	Percentage of Total Outstanding Unpaid Principal Balance
Texas	10.0%
California	8.9%
Florida	6.7%
Virginia	5.9%
North Carolina	5.8%
Georgia	5.8%
New Jersey	5.6%
Washington	5.5%
Colorado	5.2%
All other	40.6%
Total	100.0%

Geographic concentrations of investments expose the Company to the risk of economic downturns within the relevant states. Any such downturn in a state where the Company holds significant investments could affect the underlying borrower's ability to make the mortgage payment and, therefore, could have a meaningful, negative impact on the Company's Servicing Related Assets.

Note 6 — Equity and Earnings per Share

Equity Incentive Plan

During 2013, the board of directors approved and the Company adopted the Cherry Hill Mortgage Investment Corporation 2013 Equity Incentive Plan ("2013 Plan"). The 2013 Plan provides for the grant of options to purchase shares of the Company's common stock, stock awards, stock appreciation rights, performance units, incentive awards and other equity-based awards, including long term incentive plan units ("LTIP-OP Units") of the Operating Partnership.

The following tables present certain information about the 2013 Plan as of the dates indicated:

Equity Incentive Plan Information

	LTIP-OP Units		Shares of Common Stock		Number of Securities Remaining Available For Future Issuance Under	Issuance
	Issued	Forefitted	Issued	Forefitted	Equity Compensation Plans	Price
March 31, 2016	(103,850)	-	(19,038)	-	1,377,112	
Number of securities issued or to be issued upon exercise	(36,500)	916	(9,465)	-	(45,049)	$ 15.80
June 30, 2016	(140,350)	916	(28,503)	-	1,332,063	
Number of securities issued or to be issued upon exercise	-	-	-	3,155	3,155	
September 30, 2016	(140,350)	916	(28,503)	3,155	1,335,218	
Number of securities issued or to be issued upon exercise	-	-	-	-	-	
December 31, 2016	(140,350)	916	(28,503)	3,155	1,335,218	
Number of securities issued or to be issued upon exercise	-	-	-	-	-	
March 31, 2017	(140,350)	916	(28,503)	3,155	1,335,218	

LTIP-OP Units are a special class of partnership interest in the Operating Partnership. LTIP-OP Units may be issued to eligible participants for the performance of services to or for the benefit of the Operating Partnership. Initially, LTIP-OP Units do not have full parity with the Operating Partnership's common units of limited partnership interest ("OP Units") with respect to liquidating distributions; however, LTIP-OP Units receive, whether vested or not, the same per-unit distributions as OP Units and are allocated their pro-rata share of the Operating Partnership's net income or loss. Under the terms of the LTIP-OP Units, the Operating Partnership will revalue its assets upon the occurrence of certain specified events, and any increase in the Operating Partnership's valuation from the time of grant of the LTIP-OP Units until such event will be allocated first to the holders of LTIP-OP Units to equalize the capital accounts of such holders with the capital accounts of the holders of OP Units. Upon equalization of the capital accounts of the holders of LTIP-OP Units with the other holders of OP Units, the LTIP-OP Units will achieve full parity with OP Units for all purposes, including with respect to liquidating distributions. If such parity is reached, vested LTIP-OP Units may be converted into an equal number of OP Units at any time and, thereafter, enjoy all the rights of OP Units, including redemption rights. Each LTIP-OP Unit awarded is deemed equivalent to an award of one share of the Company's common stock under the 2013 Plan and reduces the 2013 Plan's share authorization for other awards on a one-for-one basis.

An LTIP-OP Unit and a share of common stock of the Company have substantially the same economic characteristics in as much as they effectively share equally in the net income or loss of the Operating Partnership. Holders of LTIP-OP Units that have reached parity with OP Units have the right to redeem their LTIP-OP Units, subject to certain restrictions. The redemption is required to be satisfied, in cash, or at the Company's option, the Company may purchase the OP Units for common stock, calculated as follows: one share of the Company's common stock, or cash equal to the fair value of a share of the Company's common stock at the time of redemption, for each LTIP-OP Unit. When an LTIP-OP Unit holder redeems an OP Unit (as described above), non-controlling interest in the Operating Partnership is reduced and the Company's equity is increased.

The table below sets forth certain information regarding the LTIP-OP Units that have been granted by the board of directors (dollars in thousands, except per share data):

LTIP-OP Unit Grant Information

Grant Date	Number of Grantees	Stock Price on Grant Date	Number of Units Granted	Aggregate Fair Market Value
June 15, 2016	14	$ 15.85	36,500	$ 579
September 9, 2015	12	$ 15.80	35,000	$ 553
June 10, 2014	10	$ 19.33	31,350	$ 606

LTIP-OP Units vest ratably over the first three annual anniversaries of the grant date. The fair value of each LTIP-OP Unit was determined based on the closing price of the Company's common stock on the applicable grant date in all other cases.

As of March 31, 2017, 69,901 LTIP-OP Units have vested. The Company recognized approximately $135,000 and $147,000 in share-based compensation expense in the three month periods ended March 31, 2017 and 2016, respectively. There was approximately $705,500 of total unrecognized share-based compensation expense as of March 31, 2017, related to the 69,901 non-vested LTIP-OP Units. This unrecognized share-based compensation expense is expected to be recognized ratably over the remaining vesting period of up to three years. The aggregate expense related to the LTIP-OP Unit grants is presented as "General and administrative expense" in the Company's consolidated income statement.

On January 27, 2014, the Company granted each of the independent directors pursuant to the 2013 Plan $10,000 (based on the closing price on the grant date) of common stock (530 shares each for a total of 1,590 shares), which were fully vested on the date of grant, and $50,000 (based on the closing price on the date of grant) of restricted shares of common stock (2,651 shares each for a total of 7,953 shares) which were subject to forfeiture in certain circumstances within one year from the grant date. The restricted shares are no longer subject to forfeiture and are vested.

On September 9, 2015, the Company granted each of the independent directors pursuant to the 2013 Plan $50,000 (based on the closing price on the date of grant) of restricted shares of common stock (3,165 each for a total of 9,495 shares) which were subject to forfeiture in certain circumstances within one year from the grant date. The shares are no longer subject to forfeiture and are vested.

On June 15, 2016, pursuant to the 2013 Plan, the Company granted each of the independent directors $50,000 (based on the closing price on the date of grant) of restricted shares of common stock (3,155 shares each for a total of 9,465 shares) which were subject to forfeiture in certain circumstances within one year from the grant date. This unrecognized share-based compensation expense is expected to be recognized ratably over the vesting period. The 3,155 shares granted to Mr. Kislak were forfeited when he resigned as a director of the Company on September 19, 2016. The forfeited shares have been returned to the shares available for future issuance under the 2013 Plan.

As of March 31, 2017, 1,335,218 shares of common stock remain available for future issuance under the 2013 Plan.

Non-Controlling Interests in Operating Partnership

Non-controlling interests in the Operating Partnership in the accompanying consolidated interim financial statements relate to LTIP-OP Units in the Operating Partnership held by parties other than the Company.

As of March 31, 2017, the non-controlling interest holders in the Operating Partnership owned 139,434 LTIP-OP Units, or approximately 1.1% of the Operating Partnership. Pursuant to ASC 810, *Consolidation*, changes in a parent’s ownership interest (and transactions with non-controlling interest unit holders in the Operating Partnership) while the parent retains its controlling interest in its subsidiary should be accounted for as equity transactions. The carrying amount of the non-controlling interest will be adjusted to reflect the change in its ownership interest in the subsidiary, with the offset to equity attributable to the Company.

Earnings per Share

The Company is required to present both basic and diluted earnings per share (“EPS”). Basic EPS is calculated by dividing net income (loss) applicable to common stockholders by the weighted average number of shares of common stock outstanding during each period. Diluted EPS is calculated by dividing net income (loss) applicable to common stockholders by the weighted average number of shares of common stock outstanding plus the additional dilutive effect of common stock equivalents during each period. In accordance with ASC 260, *Earnings Per Share*, if there is a loss from continuing operations, the common stock equivalents are deemed anti-dilutive and earnings (loss) per share is calculated excluding the potential common shares.

The following table presents basic earnings per share of common stock for the periods indicated (dollars in thousands, except per share data):

Earnings per Share Information

	Three Months Ended March 31,	
	2017	2016
Numerator:		
Net income attributable to common stockholders and participating securities	$ 22,587	$ (7,162)
Net income allocable to common stockholders	$ 22,178	$ (7,063)
Denominator:		
Weighted average common shares outstanding	7,634,038	7,509,543
Weighted average diluted shares outstanding	7,640,348	7,519,038
Basic and Dilutive:		
Basic earnings per share	$ 2.91	$ (0.94)
Diluted earnings per share	$ 2.90	$ (0.94)

There were no participating securities or equity instruments outstanding that were anti-dilutive for purposes of calculating earnings per share for the periods presented.

Note 7 — Transactions with Affiliates and Affiliated Entities

Manager

The Company has entered into the Management Agreement with the Manager, pursuant to which the Manager provides for the day-to-day management of the Company's operations. The Management Agreement requires the Manager to manage the Company's business affairs in conformity with the policies that are approved and monitored by the Company's board of directors. The Management Agreement terminates on October 22, 2020, subject to automatic renewal for successive one-year terms and to certain termination rights. The Manager's performance is reviewed prior to any renewal and may be terminated by the Company for cause without payment of a termination fee, or may be terminated without cause with payment of a termination fee, as defined in the Management Agreement, equal to three times the average annual management fee amount earned by the Manager during the two four-quarter periods ending as of the end of the most recently completed fiscal quarter prior to the effective date of the termination, upon either the affirmative vote of at least two-thirds of the members of the board of directors or the affirmative vote of the holders of at least a majority of the outstanding common stock. Pursuant to the Management Agreement, the Manager, under the supervision of the Company's board of directors, formulates investment strategies, arranges for the acquisition of assets, arranges for financing, monitors the performance of the Company's assets and provides certain advisory, administrative and managerial services in connection with the operations of the Company. For performing these services, the Company pays the Manager the management fee which is payable in cash quarterly in arrears, in an amount equal to 1.5% per annum of the stockholders' equity (as defined in the Management Agreement).

The Manager is a party to a services agreement (the "Services Agreement") with Freedom Mortgage, pursuant to which Freedom Mortgage provides to the Manager the personnel, services and resources as needed by the Manager to enable the Manager to carry out its obligations and responsibilities under the Management Agreement. The Company is a named third-party beneficiary to the Services Agreement and, as a result, has, as a non-exclusive remedy, a direct right of action against Freedom Mortgage in the event of any breach by the Manager of any of its duties, obligations or agreements under the Management Agreement that arise out of or result from any breach by Freedom Mortgage of its obligations under the Services Agreement. The Services Agreement will terminate upon the termination of the Management Agreement. Pursuant to the Services Agreement, the Manager will make certain payments to Freedom Mortgage in connection with the services provided. As a result, the Management Agreement between the Company and the Manager was negotiated between related parties, and the terms, including fees payable, may not be as favorable to the Company as if it had been negotiated with an unaffiliated third party. At the time the Management Agreement was negotiated, both the Manager and Freedom Mortgage were controlled by Mr. Stanley Middleman, who is also a shareholder of the Company. Ownership of the Manager has been transferred to CHMM Blind Trust, a grantor trust for the benefit of Mr. Middleman.

The Management Agreement provides that the Company will reimburse the Manager for (i) various expenses incurred by the Manager or its officers, and agents on the Company's behalf, including costs of software, legal, accounting, tax, administrative and other similar services rendered for the Company by providers retained by the Manager and (ii) the allocable portion of the compensation paid to specified officers dedicated to the Company. "Due to affiliates" consisted of the following for the periods indicated (dollars in thousands):

Management Fee to Affiliate

	Three Months Ended March 31,	
	2017	2016
Management fees	$ 701	$ 560
Compensation reimbursement	191	130
Total	**$ 892**	**$ 690**

Subservicing Agreement

Freedom Mortgage is directly servicing the Company's portfolio of Fannie Mae and Freddie Mac MSRs pursuant to a subservicing agreement entered into on June 10, 2015. The agreement has an initial term of three (3) years, expiring on September 1, 2018, and is subject to automatic renewal for additional three year terms unless either party chooses not to renew. The agreement may be terminated without cause by either party by giving notice as specified in the agreement. Under that agreement, Freedom Mortgage agrees to service the applicable mortgage loans in accordance with applicable law and the requirements of the applicable agency. The Company pays fees for specified services.

Joint Marketing Recapture Agreement

In June 2016, Aurora entered into a joint marketing recapture agreement with Freedom Mortgage. Pursuant to this agreement, Freedom Mortgage will attempt to refinance certain mortgage loans underlying Aurora's MSR portfolio as directed by Aurora. If a loan is refinanced, Aurora will pay Freedom Mortgage a fee for its origination services. Freedom Mortgage will be entitled to sell the loan for its own benefit and will transfer the related MSR to Aurora. The agreement has an initial term of one year, subject to automatic renewals of one year each and subject to termination by either party upon 60 days prior notice. All new loans must qualify for sale to Fannie Mae or Freddie Mac and meet other conditions set forth in the agreement. During the quarter ended March 31, 2017, MSRs on 40 loans with an aggregate UPB of approximately $10.2 million had been received from Freedom Mortgage which generated approximately $24,600 in fees due to Freedom Mortgage.

Sale of Excess MSRs

On November 15, 2016, the Company completed the sale of the Excess MSRs in Excess MSR Pool 1 and the Excess MSRs in Excess MSR Pool 2014 to Freedom Mortgage. At the closing, the Company received cash proceeds of approximately $38.0 million, repaid $12.0 million of outstanding borrowings drawn on the Company's $25 million term loan facility with NexBank SSB (the "NexBank term loan"), with a portion of the cash proceeds and released the Company's security interests arising under Excess MSR Agreement 1 and the Flow and Bulk Excess MSR Purchase Agreement. The Company invested the remaining cash proceeds in Agency RMBS and expects to redeploy those proceeds into future MSR acquisitions. The Company completed the sale of the Excess MSRs in Excess MSR Pool 2 to Freedom Mortgage on February 1, 2017. In connection with the sale of those Excess MSRs, Freedom Mortgage transferred to Aurora Ginnie Mae MSRs with a weighted average servicing fee of approximately 30 basis points. The Ginnie Mae MSRs relate to a pool consisting primarily of newly originated Ginnie Mae conforming mortgage loans that had an aggregate UPB of approximately $4.5 billion as of January 31, 2017. At the closing of the sale of the Excess MSRs in Excess MSR Pool 2, the Company repaid the remaining outstanding borrowings drawn on the NexBank term loan with cash on hand. In addition, the acknowledgment agreement that the Company and Freedom Mortgage entered into with Ginnie Mae at the time of the IPO was terminated.

In connection with the sale transactions, Freedom Mortgage agreed to make 12 monthly yield maintenance payments to the Company beginning in December 2016 aggregating $3.0 million.

See Note 5 for a discussion of the now terminated co-investments in Excess MSRs with Freedom Mortgage. See Note 10 for a discussion of the now terminated acknowledgment agreement among the Company, Freedom Mortgage and Ginnie Mae.

Other Transactions with Affiliated Entities

The Company, through one of its subsidiaries, has entered into an uncommitted master repurchase agreement with Freedom Mortgage pursuant to which the Company may, from time to time, purchase a newly issued Ginnie Mae RMBS, subject to Freedom Mortgage's agreement to repurchase the security at a future date, generally no more than 90 days later. The Company simultaneously re-hypothecates the security to one of its counterparties with whom it has a repurchase agreement, for an identical term. For the three month period ended March 31, 2017, there was no related income or expense earned or incurred. For the three month period ended March 31, 2016, the Company earned approximately $2,000 in income and had a corresponding expense of less than $1,000 which are included in "Interest income" and "Interest expense", respectively, on the consolidated statements of income. There were no such assets, or related liabilities, as of March 31, 2017 and December 31, 2016.

Note 8 — Derivative Instruments

Interest Rate Swap Agreements, Swaptions, TBAs and Treasury Futures

In order to help mitigate exposure to higher short-term interest rates in connection with its repurchase agreements, the Company enters into interest rate swap agreements. These agreements establish an economic fixed rate on related borrowings because the variable-rate payments received on the interest rate swap agreements largely offset interest accruing on the related borrowings, leaving the fixed-rate payments to be paid on the interest rate swap agreements as the Company's effective borrowing rate, subject to certain adjustments including changes in spreads between variable rates on the interest rate swap agreements and actual borrowing rates. A swaption is an option granting its owner the right but not the obligation to enter into an underlying swap. The Company's interest rate swap agreements and swaptions have not been designated as qualifying hedging instruments for GAAP purposes.

In order to help mitigate duration risk and basis risk management, the Company utilizes Treasury futures and forward-settling purchases and sales of RMBS where the underlying pools of mortgage loans are TBAs. Pursuant to these TBA transactions, the Company agrees to purchase or sell, for future delivery, RMBS with certain principal and interest terms and certain types of underlying collateral, but the particular RMBS to be delivered is not identified until shortly before the TBA settlement date.

The following table summarizes the outstanding notional amounts of derivative instruments as of the dates indicated (dollars in thousands):

Non-hedge derivatives	**March 31, 2017**	**December 31, 2016**
Notional amount of interest rate swaps	$ 609,950	$ 415,850
Notional amount of swaptions	80,000	70,000
Notional amount of TBAs, net	-	(6,000)
Notional amount of Treasury futures	37,500	50,000
Notional amount of options on Treasury futures	15,000	20,000
Total notional amount	**$ 742,450**	**$ 549,850**

The following table presents information about the Company's interest rate swap agreements as of the dates indicated (dollars in thousands):

	Notional Amount	Weighted Average Pay Rate	Weighted Average Receive Rate	Weighted Average Years to Maturity
March 31, 2017	$ 609,950	1.70%	1.07%	5.5
December 31, 2016	$ 415,850	1.46%	0.90%	4.8

The following table presents information about the Company's interest rate swaption agreements as of the dates indicated (dollars in thousands):

	Notional Amount	Weighted Average Pay Rate	Weighted Average Receive Rate(A)	Weighted Average Years to Maturity
March 31, 2017	$ 80,000	2.76%	LIBOR-BBA%	10.9
December 31, 2016	$ 70,000	2.74%	LIBOR-BBA%	10.9

(A) Floats in accordance with LIBOR.

The following table presents information about derivatives realized gain (loss), which is included on the consolidated statement of income (loss) for the periods indicated (dollars in thousands):

Realized Gains (Losses) on Derivatives

Non-Hedge Derivatives	Income Statement Location	Three Months Ended March 31, 2017	Three Months Ended March 31, 2016
Interest rate swaps	Realized gain (loss) on derivatives, net	$ (159)	$ (1,350)
Swaptions	Realized gain (loss) on derivatives, net	(69)	-
TBAs	Realized gain (loss) on derivatives, net	(112)	(82)
Treasury futures	Realized gain (loss) on derivatives, net	(677)	(29)
Total		**$ (1,017)**	**$ (1,461)**

Offsetting Assets and Liabilities

The Company has netting arrangements in place with all of its derivative counterparties pursuant to standard documentation developed by the International Swap and Derivatives Association ("ISDA"). Under GAAP, if the Company has a valid right of offset, it may offset the related asset and liability and report the net amount. The Company presents interest rate swaps, swaptions and Treasury futures assets and liabilities on a gross basis in its consolidated balance sheets. The Company presents TBA assets and liabilities on a net basis in its consolidated balance sheets. The Company presents repurchase agreements in this section even though they are not derivatives because they are subject to master netting arrangements. However, repurchase agreements are presented on a gross basis. Additionally, the Company does not offset financial assets and liabilities with the associated cash collateral on the consolidated balance sheets.

The following tables present information about the Company's assets and liabilities that are subject to master netting arrangements or similar agreements and can potentially be offset on the Company's consolidated balance sheets as of the dates indicated (dollars in thousands):

Offsetting Assets and Liabilities

As of March 31, 2017

	Gross Amounts of Recognized Assets or Liabilities	Gross Amounts Offset in the Consolidated Balance Sheet	Net Amounts of Assets Presented in the Consolidated Balance Sheet	Gross Amounts Not Offset in the Consolidated Balance Sheet		Net Amount

Note 9 – Fair Value

Fair Value Measurements

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 clarifies that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives the highest priority to quoted prices available in active markets (i.e., observable inputs) and the lowest priority to data lacking transparency (i.e., unobservable inputs). Additionally, ASC 820 requires an entity to consider all aspects of nonperformance risk, including the entity's own credit standing, when measuring fair value of a liability.

ASC 820 establishes a three level hierarchy to be used when measuring and disclosing fair value. An instrument's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation. Following is a description of the three levels:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities as of the measurement date under current market conditions. Additionally, the entity must have the ability to access the active market and the quoted prices cannot be adjusted by the entity.

Level 2 inputs include quoted prices in active markets for similar assets or liabilities; quoted prices in inactive markets for identical or similar assets or liabilities; or inputs that are observable or can be corroborated by observable market data by correlation or other means for substantially the full-term of the assets or liabilities.

Level 3 unobservable inputs are supported by little or no market activity. The unobservable inputs represent the assumptions that management believes market participants would use to price the assets and liabilities, including risk. Generally, Level 3 assets and liabilities are valued using pricing models, discounted cash flow methodologies, or similar techniques that require significant judgment or estimation.

Recurring Fair Value Measurements

The following is a description of the methods used to estimate the fair values of the Company's assets and liabilities measured at fair value on a recurring basis, as well as the basis for classifying these assets and liabilities as Level 2 or 3 within the fair value hierarchy. The Company's valuations consider assumptions that it believes a market participant would consider in valuing the assets and liabilities, the most significant of which are disclosed below. The Company reassesses and periodically adjusts the underlying inputs and assumptions used in the valuations for recent historical experience, as well as for current and expected relevant market conditions.

RMBS

The Company holds a portfolio of RMBS that are classified as available for sale and are carried at fair value in the consolidated balance sheets. The Company determines the fair value of its RMBS based upon prices obtained from third-party pricing providers. The third-party pricing providers use pricing models that generally incorporate such factors as coupons, primary and secondary mortgage rates, rate reset period, issuer, prepayment speeds, credit enhancements and expected life of the security. As a result, the Company classified 100% of its RMBS as Level 2 fair value assets at March 31, 2017 and December 31, 2016.

Excess MSRs

The Company held a portfolio of Excess MSRs that are reported at fair value in the consolidated balance sheet at December 31, 2016. The Company uses a discounted cash flow model to estimate the fair value of these assets. Although Excess MSR transactions are observable in the marketplace, the valuation includes unobservable market data inputs (prepayment speeds, delinquency levels and discount rates). As a result, the Company classified 100% of its Excess MSRs as Level 3 fair value assets at December 31, 2016. The Company did not hold any Excess MSRs at March 31, 2017.

MSRs

The Company holds a portfolio of MSRs that are reported at fair value in the consolidated balance sheets. The Company uses a discounted cash flow model to estimate the fair value of these assets. Although MSR transactions are observable in the marketplace, the valuation includes unobservable market data inputs (prepayment speeds, delinquency levels, costs to service and discount rates). As a result, the Company classified 100% of its MSRs as Level 3 fair value assets at March 31, 2017 and December 31, 2016.

Derivative Instruments

The Company enters into a variety of derivative financial instruments as part of its economic hedging strategies. The Company executes interest rate swaps, swaptions, TBAs and treasury futures. The Company utilizes third-party pricing providers to value its financial derivative instruments. As a result, the Company classified 100% of the derivative instruments as Level 2 fair value assets and liabilities at March 31, 2017 and December 31, 2016.

Both the Company and the derivative counterparties under their netting arrangements are required to post cash collateral based upon the net underlying market value of the Company's open positions with the counterparties. Posting of cash collateral typically occurs daily, subject to certain dollar thresholds. Due to the existence of netting arrangements, as well as frequent cash collateral posting at low posting thresholds, credit exposure to the Company and/or counterparties is considered materially mitigated. The Company's interest rate swaps are required to be cleared on an exchange, which further mitigates, but does not eliminate, credit risk. Based on the Company's assessment, there is no requirement for any additional adjustment to derivative valuations specifically for credit.

The following tables present the Company's assets and liabilities measured at fair value on a recurring basis as of the dates indicated (dollars in thousands).

Recurring Fair Value Measurements

As of March 31, 2017

	Level 1	**Level 2**	**Level 3**	**Carrying Value**
Assets				
RMBS				
Fannie Mae	$ -	$ 728,267	$ -	$ 728,267

The Company may be required to measure certain assets or liabilities at fair value from time to time. These periodic fair value measures typically result from application of certain impairment measures under GAAP. These items would constitute nonrecurring fair value measures under ASC 820. As of March 31, 2017 and December 31, 2016, the Company did not have any assets or liabilities measured at fair value on a nonrecurring basis in the periods presented.

Level 3 Assets and Liabilities

The valuation of Level 3 instruments requires significant judgment by the third-party pricing providers and management. The third-party pricing providers and management rely on inputs such as market price quotations from market makers (either market or indicative levels), original transaction price, recent transactions in the same or similar instruments, and changes in financial ratios or cash flows to determine fair value. Level 3 instruments may also be discounted to reflect illiquidity and/or non-transferability, with the amount of such discount estimated by third-party pricing providers and management in the absence of market information. Assumptions used by third-party pricing providers and management due to lack of observable inputs may significantly impact the resulting fair value and, therefore, the Company’s consolidated financial statements. The Company’s management reviews all valuations that are based on pricing information received from third-party pricing providers. As part of this review, prices are compared against other pricing or input data points in the marketplace, along with internal valuation expertise, to ensure the pricing is reasonable.

In connection with the above, the Company estimates the fair value of its Servicing Related Assets based on internal pricing models rather than quotations, and compares the results of these internal models against the results from models generated by third-party valuation specialists. The determination of estimated cash flows used in pricing models is inherently subjective and imprecise.

Changes in market conditions, as well as changes in the assumptions or methodology used to determine fair value, could result in a significant change to estimated fair values. It should be noted that minor changes in assumptions or estimation methodologies can have a material effect on these derived or estimated fair values, and that the fair values reflected below are indicative of the interest rate and credit spread environments as of March 31, 2017 and December 31, 2016 and do not take into consideration the effects of subsequent changes in market or other factors.

The tables below present the reconciliation for the Company's Level 3 assets (Servicing Related Assets) measured at fair value on a recurring basis as of the dates indicated (dollars in thousands):

Level 3 Fair Value Measurements

As of March 31, 2017

	Level 3 (A)		
	Pool 2	**MSRs**	**Total**
Balance at December 31, 2016	**$ 29,392**	**$ 31,871**	**$ 61,263**
Purchases, sales and principal paydowns:			
Purchases	-	33,340	33,340
Sales	(35,905)	-	(36,748)
Other changes (B)	6,513	(825)	6,531
Purchases, sales and principal paydowns:	$ (29,392)	$ 32,515	$ 3,123
Changes in Fair Value due to:			
Changes in valuation inputs or assumptions used in valuation model	-	13,265	13,265
Other changes in fair value (C)	-	(953)	(953)
Unrealized gain (loss) included in Net Income	$ -	$ 12,312	$ 12,312
Balance at March 31, 2017	**$ -**	**$ 76,698**	**$ 76,698**

As of December 31, 2016

	Level 3 (A)				
	Pool 1	**Pool 2**	**Excess MSR Pool 2014**	**MSRs**	**Total**
Balance at December 31, 2015	**$ 43,482**	**$ 33,054**	**$ 1,506**	**$ 19,761**	**$ 97,803**
Purchases, sales and principal paydowns:					
Purchases	-	-	-	16,179	16,179
Sales	(39,916)	-	(1,179)	-	(41,095)
Proceeds from principal paydowns	(3,566)	(3,911)	(327)	-	(7,804)
Other changes (B)	-	-	-	(784)	(784)
Purchases, sales and principal paydowns:	$ (43,482)	$ (3,911)	$ (1,506)	$ 15,395	$ (33,504)
Changes in Fair Value due to:					
Changes in valuation inputs or assumptions used in valuation model	-	249	-	227	476
Other changes in fair value (C)	-	-	-	(3,512)	(3,512)
Unrealized gain (loss) included in Net Income	$ -	$ 249	$ -	$ (3,285)	$ (3,036)
Balance at December 31, 2016	**$ -**	**$ 29,392**	**$ -**	**$ 31,871**	**$ 61,263**

(A) Includes the recapture agreement for each respective pool.
(B) Represents purchase price adjustments, principally contractual prepayment protection, and changes due to the Company's repurchase of the underlying collateral.
(C) Represents changes due to realization of expected cash flows.

The tables below present information about the significant unobservable inputs used in the fair value measurement of the Company's Servicing Related Assets classified as Level 3 fair value assets as of the dates indicated (dollars in thousands):

Fair Value Measurements

As of March 31, 2017

	Fair Value	**Valuation Technique**	**Unobservable Input (A)**	**Range**	**Weighted Average**
MSRs					
Conventional	$ 31,088	Discounted cash flow	Constant prepayment speed	0.4% - 21.6%	10.6%
			Uncollected payments	0.4% - 5.2%	0.8%
			Discount rate		9.3%
			Annual cost to service, per loan		$ 71
Government	$ 45,610	Discounted cash flow	Constant prepayment speed	5.3% - 20.5%	8.6%
			Uncollected payments	1.6% - 67.0%	3.7%
			Discount rate		12.0%
			Annual cost to service, per loan		$ 96
TOTAL	**$ 76,698**	**Discounted cash flow**			

As of December 31, 2016

	Fair Value	Valuation Technique	Unobservable Input (A)	Range	Weighted Average
Excess MSR Pool 2	$ 29,392	Discounted cash flow	Constant prepayment speed	7.8% - 31.9%	14.3%
			Uncollected Payments	8.3% - 13.1%	11.9%
			Discount rate		16.2%
Conventional MSRs	$ 31,871	Discounted cash flow	Constant prepayment speed	7.1% - 24.9%	10.6%
			Uncollected payments	0.8% - 1.4%	1.3%
			Discount rate		9.3%
			Annual cost to service, per loan		$ 64
TOTAL	**$ 61,263**	**Discounted cash flow**			

(A) Significant increases (decreases) in any of the inputs in isolation may result in significantly lower (higher) fair value measurement. A change in the assumption used for discount rates may be accompanied by a directionally similar change in the assumption used for the probability of uncollected payments and a directionally opposite change in the assumption used for prepayment rates.

Fair Value of Financial Instruments not Carried at Fair Value in Balance Sheets

In accordance with ASC 820, the Company is required to disclose the fair value of financial instruments, both assets and liabilities recognized and not recognized in the consolidated balance sheet, for which fair value can be estimated. The following describes the Company's methods for estimating the fair value for financial instruments.

- RMBS available for sale securities, Servicing Related Assets, derivative assets and derivative liabilities are recurring fair value measurements; carrying value equals fair value. See discussion of valuation methods and assumptions within the "Fair Value Measurements" section of this footnote.

- Cash and cash equivalents and restricted cash have a carrying value which approximates fair value because of the short maturities of these instruments.

- The carrying value of repurchase agreements and corporate debt that mature in less than one year generally approximates fair value due to the short maturities. The Company does not hold any repurchase agreements that are considered long-term.

Corporate debt that matures in more than one year with a floating rate generally approximates fair value.

Note 10 — Commitments and Contingencies

The following represents commitments and contingencies of the Company as of March 31, 2017 and December 31, 2016:

Management Agreement

The Company pays the Manager a quarterly management fee, calculated and payable quarterly in arrears, equal to the product of one quarter of the 1.5% management fee annual rate and the stockholders' equity, adjusted as set forth in the Management Agreement as of the end of such fiscal quarter. The Company relies on resources of Freedom Mortgage to provide the Manager with the necessary resources to conduct Company operations. For further discussion regarding the management fee, see Note 7.

Legal and Regulatory

From time to time, the Company may be subject to potential liability under laws and government regulations and various claims and legal actions arising in the ordinary course of business. Liabilities are established for legal claims when payments associated with the claims become probable and the costs can be reasonably estimated. The actual costs of resolving legal claims may be substantially higher or lower than the amounts established for those claims. Based on information currently available, management is not aware of any legal or regulatory claims that would have a material effect on the Company's consolidated financial statements, and, therefore, no accrual is required as of March 31, 2017 and December 31, 2016.

Commitments to Purchase/Sell RMBS

As of March 31, 2017 and December 31, 2016, the Company held forward TBA purchase and sale commitments, respectively, with counterparties, which are forward RMBS trades, whereby the Company committed to purchasing a pool of securities at a particular interest rate. As of the date of the trade, the mortgage-backed securities underlying the pool that will be delivered to fulfill a TBA trade are not yet designated. The securities are typically “to be announced” 48 hours prior to the established trade settlement date.

As of March 31, 2017, the Company was obligated to purchase approximately $257.8 million of Fannie Mae and Freddie Mac securities and was not obligated to sell any securities and they have been classified within "payables for unsettled trades" on the consolidated balance sheet. As of December 31, 2016, the Company was not obligated to purchase any securities and was obligated to sell approximately $6.0 million of securities which have been classified within “payables for unsettled trades” on the consolidated balance sheets.

Acknowledgment Agreements

In order to have Ginnie Mae acknowledge our interest in Excess MSRs related to FHA and VA mortgage loans that were pooled into securities guaranteed by Ginnie Mae, the Company entered into an acknowledgment agreement with Ginnie Mae and Freedom Mortgage. Under that agreement, if Freedom Mortgage failed to make a required payment to the holders of the Ginnie Mae-guaranteed RMBS, the Company would have been obligated to make that payment even though the payment may have related to loans for which the Company did not own any Excess MSRs. The Company’s failure to make that payment would have resulted in liability to Ginnie Mae for any losses or claims that it suffered as a result. This agreement was terminated in February 2017 in connection with the disposition of the remaining Excess MSRs back to Freedom Mortgage.

In connection with the MSR Financing Facility (as defined below) entered into by Aurora and QRS III, those parties also entered into an acknowledgment agreement with Fannie Mae. Pursuant to that agreement, Fannie Mae consented to the pledge by Aurora and QRS III of their respective interests in MSRs for loans owned or securitized by Fannie Mae, and acknowledged the security interest of the lender in those MSRs. See Note 12—Notes Payable for a description of the MSR Financing Facility.

Note 11 – Repurchase Agreements

The Company had outstanding approximately $773.3 million and $594.6 million of repurchase agreements as of March 31, 2017 and December 31, 2016, respectively. The Company’s obligations under these agreements had weighted average remaining maturities of 78 days and 65 days as of March 31, 2017 and December 31, 2016, respectively. RMBS and cash have been pledged as collateral under these repurchase agreements (see Note 4).

The repurchase agreements had the following remaining maturities and weighted average rates as of the dates indicated (dollars in thousands):

Repurchase Agreement Characteristics

As of March 31, 2017

	Repurchase Agreements	Weighted Average Rate
Less than one month	$ 149,363	1.04%
One to three months	269,063	0.98%
Greater than three months	354,891	1.08%
Total/Weighted Average	**$ 773,317**	**1.04%**

As of December 31, 2016

	Repurchase Agreements	Weighted Average Rate
Less than one month	$ 60,690	1.14%
One to three months	456,502	0.91%
Greater than three months	77,423	0.90%
Total/Weighted Average	**$ 594,615**	**0.93%**

There were no overnight or demand securities as of March 31, 2017 or December 31, 2016.

Note 12 – Notes Payable

At December 31, 2016 the Company had outstanding borrowings of $8.9 million on the $25 million NexBank term loan. The $25 million NexBank term loan was paid in full in connection with the sale of the Excess MSRs in Excess MSR Pool 2 back to Freedom Mortgage in February 2017.

In September 2016, Aurora and QRS III entered into a loan and security agreement (the "MSR Financing Facility"), pursuant to which Aurora and QRS III pledged their respective rights in all existing and future MSRs for loans owned or securitized by Fannie Mae to secure borrowings up to a maximum of $25.0 million outstanding at any one time. The facility has a two-year revolving period, subject to extension by agreement, during which only interest payments are due. Borrowings bear interest at a spread over one month LIBOR. At the end of the revolving period, the outstanding amount will be converted to a three-year term loan with monthly payments of interest (calculated as a spread over the rate for one-year interest rate swaps) and principal (calculated on a ten-year amortization schedule).

The outstanding long-term borrowings had the following remaining maturities as of the dates indicated (dollars in thousands):

Long-Term Borrowings Repayment Characteristics

As of March 31, 2017

	2018	2019	2020	2021	2022	Total
MSR Financing Facility						
Borrowings under MSR Financing facility	$ -	$ 616	$ 1,282	$ 1,352	$ 12,750	$ 16,000

As of December 31, 2016

	2017	2018	2019	2020	2021	Total
Term Loan						
Borrowings under Term Loan facility	$ 2,841	$ 3,005	$ 3,040	$ -	$ -	$ 8,886
MSR Financing Facility						
Borrowings under MSR Financing facility	$ -	$ 271	$ 1,118	$ 1,175	$ 11,436	$ 14,000

Note 13 – Receivables and Other Assets

The assets comprising “Receivables and other assets” as of March 31, 2017 and December 31, 2016 are summarized in the following table (dollars in thousands):

Receivables and Other Assets

	March 31, 2017	December 31, 2016
Excess servicing income receivable	$ 2,000	$ 5,598
Servicing advances	3,063	1,432
Interest receivable	2,741	2,069
Repurchased loans held for sale	474	1,570
Other receivables	2,007	1,628
Total other assets	$ 10,285	$ 12,297

The Company only records as an asset those servicing advances that the Company deems recoverable.

As a result of the Company's investments in MSRs, it is obligated from time to time to repurchase an underlying loan from the agency for which it is being serviced due to an alleged breach of a representation or warranty. Loans acquired in this manner are recorded at the purchase price less any principal recoveries and are then offered for sale in the scratch and dent market. The Company did not purchase any loans in the three month period ended March 31, 2017. In the year ended December 31, 2016, the Company purchased five loans, with an aggregate UPB of approximately $1.64 million at the time of purchase, as required by the applicable agency. Four of these loans have been sold with no resulting loss. The remaining repurchased loan is considered to be a Level 2 Asset and is expected to be sold in 2017.

Note 14 – Income Taxes

The Company elected to be taxed as a REIT under Code Sections 856 through 860 beginning with its short taxable year ended December 31, 2013. As a REIT, the Company generally will not be subject to U.S. federal income tax to the extent that it distributes its taxable income to its stockholders. To maintain qualification as a REIT, the Company must distribute at least 90% of its annual REIT taxable income to its stockholders and meet certain other requirements such as assets it may hold, income it may generate and its stockholder composition. It is the Company’s policy to distribute all or substantially all of its REIT taxable income. To the extent there is any undistributed REIT taxable income at the end of a year, the Company can elect to distribute such shortfall within the next year as permitted by the Code.

Effective January 1, 2014, CHMI Solutions has elected to be taxed as a corporation for U.S. federal income tax purposes; prior to this date, CHMI Solutions was a disregarded entity for U.S. federal income tax purposes. CHMI Solutions has jointly elected with the Company, the ultimate beneficial owner of CHMI Solutions, to be treated as a taxable REIT subsidiary (“TRS”) of the Company, and all activities conducted through CHMI Solutions and its wholly-owned subsidiary, Aurora, are subject to federal and state income taxes. CHMI Solutions files a consolidated tax return with Aurora and is fully taxed as a U.S. C-Corporation.

The state and local tax jurisdictions for which the Company is subject to tax-filing obligations recognize the Company’s status as a REIT, and therefore, the Company generally does not pay income tax in such jurisdictions. CHMI Solutions and Aurora are subject to U.S. federal, state and local income taxes.

The components of the Company’s income tax expense (benefit) are as follows for the periods indicated below (dollars in thousands):

	Three Months Ended March 31,	
	2017	2016
Current federal income tax expense	$ 7	$ -
Current state income tax expense	1	-
Deferred federal income tax expense (benefit)	1,201	(499)
Deferred state income tax expense (benefit)	130	(91)
Total Income Tax Expense	**$ 1,339**	**$ (590)**

The following is a reconciliation of the statutory federal rate to the effective rate, for the periods indicated below (dollars in thousands):

	Three Months Ended March 31,			
	2017		2016	
Computed income tax (benefit) expense at federal rate	$ 8,374	35.0%	$ (2,713)	35.0%
State taxes, net of federal benefit, if applicable	136	0.6%	(59)	0.8%
Permanent differences in taxable income from GAAP pre-tax income	-	-	-	(0.1)
REIT income not subject to tax	(7,171)	(30.0)%	2,182	(28.1)%
(Benefit from) Provision for Income Taxes/Effective Tax Rate[(A)]	**$ 1,339**	**5.6%**	**$ (590)**	**7.6**

(A) The provision for income taxes is recorded at the TRS level.

The Company’s consolidated balance sheets, at March 31, 2017 and December 31, 2016, contain the following current and deferred tax liabilities and assets, which are recorded at the TRS level (dollars in thousands):

	Three Months Ended March 31,	
	2017	2016
Income taxes payable		
Federal income taxes payable	$ 7	$ -
State and local income taxes payable	1	-
Income taxes payable	**$ 8**	**$ -**
	March 31, 2017	**December 31, 2016**
Deferred tax (assets) liabilities		
Deferred tax - organizational expenses	$ (50)	$ (53)
Deferred tax - mortgage servicing rights	1,011	(340)
Total net deferred tax (assets) liabilities	**$ 961**	**$ (393)**

The deferred tax liability as of March 31, 2017 was primarily related to mortgage servicing rights. The deferred tax liability as of December 31, 2016 was primarily related to mortgage servicing rights. No valuation allowance has been established at March 31, 2017 and December 31, 2016. As of March 31, 2017 and December 31, 2016, the deferred tax liability is included in “Accrued expenses and other liabilities” in the consolidated balance sheets

Based on the Company’s evaluation, the Company has concluded that there are no significant uncertain tax positions requiring recognition in the Company’s consolidated financial statements. Additionally, there were no amounts accrued for penalties or interest as of or during the periods presented in these consolidated financial statements.

The Company’s 2016, 2015, 2014, 2013 and 2012 federal, state and local income tax returns remain open for examination by the relevant authorities.

Note 15 – Subsequent Events

Events subsequent to March 31, 2017 were evaluated and no additional events were identified requiring further disclosure in the interim consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with our interim consolidated financial statements and the accompanying notes included in "Part I, Item 1. Consolidated Financial Statements" of this Quarterly Report on Form 10-Q.

All currency amounts are presented in thousands, except per share amounts or otherwise noted.

General

Cherry Hill Mortgage Investment Corporation (the "Company", "we", "our" or "us") is a public residential real estate finance company focused on acquiring, investing in and managing residential mortgage assets in the United States. We were incorporated in Maryland on October 31, 2012, and we commenced operations on or about October 9, 2013 following the completion of our initial public offering ("IPO") and a concurrent private placement. Our common stock is listed and traded on the New York Stock Exchange under the symbol "CHMI." We are externally managed by Cherry Hill Mortgage Management, LLC (the "Manager"), an SEC-registered investment adviser and a related party of Freedom Mortgage Corporation ("Freedom Mortgage").

Our principal objective is to generate attractive current yields and risk-adjusted total returns for our stockholders over the long term, primarily through dividend distributions and secondarily through capital appreciation. We attempt to attain this objective by selectively constructing and actively managing a portfolio of mortgage servicing rights ("MSRs" or "Servicing Related Assets") and residential mortgage-backed securities ("RMBS"), and subject to market conditions, other cash flowing residential mortgage assets.

We are subject to the risks involved with real estate and real estate-related debt instruments. These include, among others, the risks normally associated with changes in the general economic climate, changes in the mortgage market, changes in tax laws, interest rate levels, and the availability of financing.

We elected to be treated as a real estate investment trust ("REIT") under the Internal Revenue Code of 1986, as amended (the "Code") commencing with our short taxable year ended December 31, 2013. We operate so as to continue to qualify to be taxed as a REIT. Our asset acquisition strategy focuses on acquiring a diversified portfolio of residential mortgage assets that balances the risk and reward opportunities our Manager observes in the marketplace. Since our IPO we have been, and we currently intend to continue as, a servicing-centric REIT with a substantial portion of our equity capital allocated to Servicing Related Assets. Prior to our acquisition of Aurora Financial Group, Inc. ("Aurora") in May 2015, these assets were limited to excess mortgage servicing rights on residential mortgage loans ("Excess MSRs"). The acquisition of Aurora included a portfolio of Federal National Mortgage Association ("Fannie Mae") and Federal Home Loan Mortgage Corporation ("Freddie Mac") MSRs with an aggregate unpaid principal balance ("UPB") of approximately $718.4 million as of May 29, 2015. Aurora subsequently acquired three additional portfolios of Fannie Mae and Freddie Mac MSRs with an aggregate UPB of approximately $3.1 billion as of their respective closing dates.

In October 2013, we entered into an agreement ("Excess MSR Agreement 1") with Freedom Mortgage to invest in Excess MSRs with Freedom Mortgage. Freedom Mortgage originated the mortgage servicing rights on the related pool of residential fixed rate Government National Mortgage Association ("Ginnie Mae") eligible Federal Housing Administration and Department of Veterans Affairs mortgage loans with an aggregate UPB of approximately $10.0 billion ("Excess MSR Pool 1"). Also in October 2013, we entered into an agreement ("Excess MSR Agreement 2") with Freedom Mortgage to invest with Freedom Mortgage in another pool of Excess MSRs. Freedom Mortgage acquired the mortgage servicing rights from a third-party seller on a pool of residential Ginnie Mae-eligible VA hybrid adjustable rate mortgage loans with an outstanding aggregate principal balance of approximately $10.7 billion ("Excess MSR Pool 2"). We also entered into a flow and bulk Excess MSR purchase agreement related to future purchases of Excess MSRs from Freedom Mortgage in October 2013 (the "Flow and Bulk Excess MSR Purchase Agreement"). In 2014, we purchased Excess MSRs from Freedom Mortgage in a series of separate transactions. We refer to the mortgage loans underlying the Excess MSRs purchased in 2014 collectively as "Excess MSR Pool 2014."

On November 15, 2016, we completed the sale of the Excess MSRs in Excess MSR Pool 1 and the Excess MSRs in Excess MSR Pool 2014 to Freedom Mortgage. At the closing, we received cash proceeds of approximately $38.0 million, repaid $12.0 million of outstanding borrowings drawn on our $25 million term loan with NexBank SSB (the “NexBank term loan”) with a portion of the cash proceeds and released our security interests arising under Excess MSR Agreement 1 and the Flow and Bulk Excess MSR Purchase Agreement. We invested the remaining cash proceeds in RMBS, the payment of principal and interest on which is guaranteed by a U.S. government agency or a U.S. government sponsored enterprise (“Agency RMBS”), and we expect to redeploy those proceeds into future MSR acquisitions. We completed the sale of the Excess MSRs in Excess MSR Pool 2 to Freedom Mortgage on February 1, 2017. In connection with the sale of the Excess MSRs in Excess MSR Pool 2 to Freedom Mortgage, Freedom Mortgage transferred to Aurora Ginnie Mae MSRs with a weighted average servicing fee of approximately 30 basis points. The Ginnie Mae MSRs relate to a pool consisting primarily of newly originated Ginnie Mae conforming mortgage loans that had an aggregate UPB of approximately $4.5 billion as of January 31, 2017. At the closing of the sale of the Excess MSRs in Excess MSR Pool 2, we repaid the remaining outstanding borrowings drawn on the $25 million NexBank term loan with cash on hand. In addition, the Acknowledgment Agreement that we and Freedom Mortgage entered into with Ginnie Mae at the time of our IPO was terminated. In connection with the sale transactions, Freedom Mortgage agreed to make 12 monthly yield maintenance payments to the Company beginning in December 2016 aggregating $3.0 million.

Aurora has the licenses necessary to service mortgage loans on a nationwide basis and is approved to service loans for Fannie Mae, Freddie Mac and Ginnie Mae.

In addition to Servicing Related Assets, we invest in whole pool Agency RMBS, primarily those backed by 30-, 20- and 15-year fixed rate mortgages (“FRMs”) that offer what we believe to be favorable prepayment and duration characteristics. We finance our RMBS with leverage, the amount of which will vary from time to time depending on the particular characteristics of our portfolio, the availability of financing and market conditions. We do not have a targeted leverage ratio for our RMBS. Our borrowings for RMBS consist of short-term borrowings under master repurchase agreements. We have also invested in Agency collateralized mortgage obligations (“CMOs”) consisting of interest-only securities as well as risk-sharing securities issued by Fannie Mae and Freddie Mac.

Subject to maintaining our qualification as a REIT, we utilize derivative financial instruments (or hedging instruments) to hedge our exposure to potential interest rate mismatches between the interest we earn on our assets and our borrowing costs caused by fluctuations in short-term interest rates. In utilizing leverage and interest rate hedges, our objectives include, where desirable, locking in, on a long-term basis, a spread between the yield on our assets and the cost of our financing in an effort to improve returns to our stockholders.

We also operate our business in a manner that permits us to maintain our exclusion from registration as an investment company under the Investment Company Act of 1940, as amended (the “Investment Company Act”).

On March 29, 2017, we issued and sold 5,175,000 shares of common stock, par value $0.01 per share, raising approximately $81.1 million after underwriting discounts and commissions before expenses of approximately $229,000. All of the net proceeds were used to invest in RMBS pending re-deployment of a substantial portion of those proceeds into the acquisition of MSRs. As a result, we had approximately $257.8 million of Agency RMBS purchased but not yet settled as of March 31, 2017. The settlement of these trades as well as additional purchases has caused a significant change in the composition of our investment portfolio which will likely persist until significant funds can be redeployed into MSRs.

Factors Impacting our Operating Results

Our income is generated primarily by the net spread between the income we earn on our assets and the cost of our financing and hedging activities as well as the amortization of any purchase premiums or the accretion of discounts. Our net income includes the actual interest payments we receive on our Excess MSRs, if any, and RMBS, the net servicing fee we receive on our MSRs and the accretion/amortization of any purchase discounts/premiums. Changes in various factors such as market interest rates, prepayment speeds, estimated future cash flows, servicing costs and credit quality could affect the amount of premium to be amortized or discount to be accreted into interest income for a given period. Market interest rates and prepayment rates vary according to the type of investment, conditions in the financial markets, competition and other factors, none of which can be predicted with any certainty. Our operating results may also be affected by credit losses in excess of initial anticipations or unanticipated credit events experienced by borrowers whose mortgage loans underlay the MSRs held by Aurora.

Set forth below is the positive gross spread between the yield on RMBS and our costs of funding those assets at the end of each of the quarters indicated below:

Average Net Yield Spread at Period End

Quarter Ended	Average Asset Yield	Average Cost of Funds	Average Net Interest Rate Spread
March 31, 2017	3.62%	1.67%	1.95%
December 31, 2016	3.53%	1.49%	2.03%
September 30, 2016	3.53%	1.44%	2.10%
June 30, 2016	3.51%	1.62%	1.88%
March 31, 2016	3.52%	1.70%	1.82%
December 31, 2015	3.52%	1.89%	1.63%
September 30, 2015	3.51%	1.93%	1.58%
June 30, 2015	3.57%	1.96%	1.61%
March 31, 2015	3.60%	1.92%	1.68%
December 31, 2014	3.66%	1.99%	1.67%
September 30, 2014	3.66%	2.00%	1.66%
June 30, 2014	3.72%	2.00%	1.71%
March 31, 2014	3.62%	2.10%	1.52%

The Average Cost of Funds also includes the benefits of related swaps.

Changes in the Market Value of Our Assets

We hold our Servicing Related Assets as long-term investments. Our Excess MSRs were, and MSRs are, carried at their fair value with changes in their fair value recorded in other income or loss in our consolidated statements of income (loss). Those values may be affected by events or headlines that are outside of our control, such as Brexit, other events impacting the U.S. or global economy generally or the U.S. residential market specifically, and events or headlines impacting the parties with which we do business. See "Part I, Item 1A. Risk Factors – Risks Related to our Business" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Our RMBS are carried at their fair value, as available-for-sale in accordance with Accounting Standards Codification ("ASC") 320, *Accounting for Certain Investments in Debt or Equity Securities*, with changes in fair value recorded through accumulated other comprehensive income (loss), a component of stockholders' equity. As a result, we do not expect that changes in the market value of our RMBS will normally impact our operating results, but such changes will affect our book value. However, at least on a quarterly basis, we assess both our ability and intent to continue to hold our RMBS as long-term investments. As part of this process, we monitor our RMBS for other-than-temporary impairment. A change in our ability and/or intent to continue to hold any of our RMBS could result in our recognizing an impairment charge or realizing losses while holding these assets.

Impact of Changes in Market Interest Rates on Our Assets

The value of our assets may be affected by prepayment rates on mortgage loans. Prepayment speed is the measurement of how quickly borrowers pay down the UPB of their loans or how quickly loans are otherwise liquidated or charged off. Generally, in a declining interest rate environment, prepayment speeds tend to increase. Conversely, in an increasing interest rate environment, prepayment speeds tend to decrease. When we acquire Servicing Related Assets or RMBS, we anticipate that the underlying mortgage loans will prepay at a projected rate generating an expected cash flow (in the case of Servicing Related Assets) and yield. If we purchase assets at a premium to par value and borrowers prepay their mortgage loans faster than expected, the corresponding prepayments on our assets may reduce the expected yield on such assets because we will have to amortize the related premium on an accelerated basis. Similarly, if we purchase assets at a discount to par value, and borrowers prepay their mortgage loans slower than expected, the decrease in corresponding prepayments may reduce the expected yield on assets because we will not be able to accrete the related discount as quickly as originally anticipated.

If prepayment speeds are significantly greater than expected, the carrying value of the Servicing Related Assets could exceed their estimated fair value. If the fair value of the Servicing Related Assets decreases, we would be required to record a non-cash charge, which would have a negative impact on our financial results. Furthermore, a significant increase in prepayment speeds could materially reduce the ultimate cash flows we receive from the Servicing Related Assets, and we could ultimately receive substantially less than what we paid for such assets. We do not utilize derivatives to hedge against changes in the fair value of the Servicing Related Assets. Our balance sheet, results of operations and cash flows are susceptible to significant volatility due to changes in the fair value of, or cash flows from, the Servicing Related Assets as interest rates change.

A slower than anticipated rate of prepayment also will cause the life of the related RMBS to extend beyond that which was projected. As a result, we would have a lower yielding asset for a longer period of time. In addition, if we have hedged our interest rate risk, extension may cause the security to be outstanding longer than the related hedge thereby reducing the protection intended to be provided by the hedge.

Voluntary and involuntary prepayment rates may be affected by a number of factors including, but not limited to, the availability of mortgage credit, the relative economic vitality of the area in which the related properties are located, the servicing of the mortgage loans, possible changes in tax laws, other opportunities for investment, homeowner mobility and other economic, social, geographic, demographic and legal factors, none of which can be predicted with any certainty.

We attempted to reduce the exposure of our Excess MSRs to voluntary prepayments through the structuring of recapture agreements with Freedom Mortgage. With the sale of our Excess MSRs to Freedom Mortgage in November 2016 and February 2017, these arrangements were terminated. In June 2016, Aurora entered into a joint marketing recapture agreement with Freedom Mortgage. Pursuant to this agreement, Freedom Mortgage will attempt to refinance certain mortgage loans underlying Aurora's portfolio of Fannie Mae and Freddie Mac MSRs as directed by Aurora. If a loan is refinanced, Aurora will pay Freedom Mortgage a fee for its origination services. Freedom Mortgage will be entitled to sell the loan for its own benefit and will transfer the related MSR to Aurora. The agreement has an initial term of one year, subject to automatic renewals of one year each and subject to termination by either party upon 60 days prior notice. All new loans must qualify for sale to Fannie Mae or Freddie Mac and meet other conditions set forth in the agreement. In the quarter ended March 31, 2017, Aurora received MSRs with an aggregate UPB of approximately $10.2 million and paid fees of approximately $24,600 to Freedom Mortgage under this program.

With respect to our business operations, increases in interest rates, in general, may over time cause:

- the interest expense associated with our borrowings to increase;
- the value of our assets to fluctuate;
- the coupons on any adjustable-rate and hybrid RMBS we may own to reset, although on a delayed basis, to higher interest rates;
- prepayments on our RMBS to slow, thereby slowing the amortization of our purchase premiums and the accretion of our purchase discounts; and
- an increase in the value of any interest rate swap agreements we may enter into as part of our hedging strategy.

Conversely, decreases in interest rates, in general, may over time cause:

- prepayments on our RMBS to increase, thereby accelerating the amortization of our purchase premiums and the accretion of our purchase discounts;

- the interest expense associated with our borrowings to decrease;
- the value of our assets to fluctuate;
- to the extent we enter into interest rate swap agreements as part of our hedging strategy, the value of these agreements to decrease; and
- coupons on any adjustable-rate and hybrid RMBS assets we may own to reset, although on a delayed basis, to lower interest rates.

Effects of Spreads on our Assets

The spread between the yield on our assets and our funding costs affects the performance of our business. Wider spreads imply greater income on new asset purchases but may have a negative impact on our stated book value. Wider spreads may also negatively impact asset prices. In an environment where spreads are widening, counterparties may require additional collateral to secure borrowings which may require us to reduce leverage by selling assets. Conversely, tighter spreads imply lower income on new asset purchases but may have a positive impact on stated book value of our existing assets. In this case, we may be able to reduce the amount of collateral required to secure borrowings.

Credit Risk

We are subject to varying degrees of credit risk in connection with our assets. Although we expect relatively low credit risk with respect to our portfolios of Agency RMBS, we are subject to the credit risk of the borrowers under the loans for which we hold MSRs. Through loan level due diligence, we attempt to mitigate this risk by seeking to acquire high quality assets at appropriate prices given anticipated and unanticipated losses. We also conduct ongoing monitoring of acquired assets. Nevertheless, unanticipated credit losses could occur which could adversely impact our operating results.

Critical Accounting Policies and Use of Estimates

Our financial statements are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”), which requires the use of estimates that involve the exercise of judgment and the use of assumptions as to future uncertainties. In accordance with U.S. Securities and Exchange Commission guidance, the following discussion addresses the accounting policies that we apply with respect to our operations. Our most critical accounting policies involve decisions and assessments that could affect our reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, as well as our reported amounts of revenues and expenses. We believe that all of the decisions and assessments upon which our financial statements are based were reasonable at the time made and based upon information available to us at that time. Our critical accounting policies and accounting estimates may be expanded over time as we diversify our portfolio. The material accounting policies and estimates that we expect to be most critical to an investor’s understanding of our financial results and condition and require complex management judgment are discussed below.

Classification of Investment Securities and Impairment of Financial Instruments

ASC 320-10, *Debt and Equity Securities*, requires that at the time of purchase, we designate a security as either trading, available-for-sale, or held-to-maturity depending on our ability and intent to hold such security to maturity. Securities available-for-sale will be reported at fair value, while securities held-to-maturity will be reported at amortized cost. Although we may hold most of our securities until maturity, we may, from time to time, sell any of our securities as part of our overall management of our asset portfolio. Accordingly, we elect to classify substantially all of our securities as available-for-sale. All assets classified as available-for-sale will be reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders’ equity. See “–Valuation of Financial Instruments.”

When the estimated fair value of a security is less than amortized cost, we consider whether there is an other-than-temporary impairment ("OTTI"), in the value of the security. An impairment is deemed an OTTI if (i) we intend to sell the security, (ii) it is more likely than not that we will be required to sell the security before recovering our cost basis, or (iii) we do not expect to recover the entire amortized cost basis of the security even if we do not intend to sell the security or believe it is more likely than not that we will be required to sell the security before recovering our cost basis. If the impairment is deemed to be an OTTI, the resulting accounting treatment depends on the factors causing the OTTI. If the OTTI has resulted from (i) our intention to sell the security, or (ii) our judgment that it is more likely than not that we will be required to sell the security before recovering our cost basis, an impairment loss is recognized in current earnings equal to the difference between our amortized cost basis and fair value. Whereas, if the OTTI has resulted from our conclusion that we will not recover our cost basis even if we do not intend to sell the security, the credit loss portion of the impairment is recorded in current earnings and the portion of the loss related to other factors, such as changes in interest rates, continues to be recognized in accumulated other comprehensive income (loss). Determining whether there is an OTTI may require management to exercise significant judgment and make significant assumptions, including, but not limited to, estimated cash flows, estimated prepayments, loss assumptions, and assumptions regarding changes in interest rates. As a result, actual impairment losses could differ from reported amounts. Such judgments and assumptions are based upon a number of factors, including (i) credit of the issuer or the borrower, (ii) credit rating of the security, (iii) key terms of the security, (iv) performance of the loan or underlying loans, including debt service coverage and loan-to-value ratios, (v) the value of the collateral for the loan or underlying loans, (vi) the effect of local, industry, and broader economic factors, and (vii) the historical and anticipated trends in defaults and loss severities for similar securities.

Valuation of Financial Instruments

ASC 820, *Fair Value Measurements and Disclosure*, ("ASC 820") defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 clarifies that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives the highest priority to quoted prices available in active markets (i.e., observable inputs) and the lowest priority to data lacking transparency (i.e., unobservable inputs). Additionally, ASC 820 requires an entity to consider all aspects of nonperformance risk, including the entity's own credit standing, when measuring fair value of a liability.

ASC 820 establishes a three level hierarchy to be used when measuring and disclosing fair value. An instrument's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation. Following is a description of the three levels:

- Level 1 inputs are quoted prices in active markets for identical assets or liabilities as of the measurement date under current market conditions. Additionally, the entity must have the ability to access the active market and the quoted prices cannot be adjusted by the entity.

- Level 2 inputs include quoted prices in active markets for similar assets or liabilities; quoted prices in inactive markets for identical or similar assets or liabilities; or inputs that are observable or can be corroborated by observable market data by correlation or other means for substantially the full-term of the assets or liabilities.

- Level 3 unobservable inputs are supported by little or no market activity. The unobservable inputs represent the assumptions that market participants would use to price the assets and liabilities, including risk. Generally, Level 3 assets and liabilities are valued using pricing models, discounted cash flow methodologies, or similar techniques that require significant judgment or estimation.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety. We have used Level 2 for our RMBS and for our derivative assets and liabilities and Level 3 for our Servicing Related Assets.

When available, we use quoted market prices to determine the fair value of an asset or liability. If quoted market prices are not available, we will consult independent pricing services or third party broker quotes, provided that there is no ongoing material event that affects the issuer of the securities being valued or the market. If there is such an ongoing event, or if quoted market prices are not available, we will determine the fair value of the securities using valuation techniques that use, when possible, current market-based or independently-sourced market parameters, such as interest rates.

Investments in Excess MSRs

Upon acquisition, we elected to record our investments in Excess MSRs at fair value. We made this election in order to provide the users of the financial statements with better information regarding the effects of prepayment risk and other market factors on the Excess MSRs. Under this election, we record a valuation adjustment on our Excess MSRs investments on a quarterly basis to recognize the changes in fair value in net income as described in "–Revenue Recognition on Investments in Excess MSRs" below.

The fair values of Excess MSRs are determined by projecting net servicing cash flows, which are then discounted to estimate the fair value. The fair values of Excess MSRs are impacted by a variety of factors, including prepayment assumptions, discount rates, delinquency rates, contractually specified servicing fees, and underlying portfolio characteristics. The underlying assumptions and estimated values are corroborated by values received from independent third parties. Changes in fair value of our Excess MSRs are reported in other income or loss in our consolidated statements of income (loss). For additional information on our fair value methodology, see "Part I, Item 1. Notes to Consolidated Financial Statements— Note 9. Fair Value."

As of March 31, 2017, all of our Excess MSRs have been sold back to Freedom Mortgage.

Revenue Recognition on Investments in Excess MSRs

Investments in Excess MSRs are aggregated into pools as applicable, and each pool of Excess MSRs is accounted for in the aggregate. Income for Excess MSRs is accreted into income on an effective yield or "interest" method, based upon the expected excess servicing amount through the expected life of the underlying mortgages. Changes to expected cash flows result in a cumulative retrospective adjustment, which will be recorded in the period in which the change in expected cash flows occurs. Under the retrospective method, the income recognized for a reporting period is measured as the difference between the amortized cost basis at the end of the period and the amortized cost basis at the beginning of the period, plus any cash received during the period. The amortized cost basis is calculated as the present value of estimated future cash flows using an effective yield, which is the yield that equates all past actual and current estimated future cash flows to the initial investment. The difference between the fair value of Excess MSRs and their amortized cost basis are recorded as "Unrealized gain (loss) on investments in Excess MSRs" in our consolidated statements of income (loss). Fair value is generally determined by discounting the expected future cash flows using discount rates that incorporate the market risks and liquidity premium specific to the Excess MSRs, and therefore may differ from their effective yields.

Investments in MSRs

The Company has elected the fair value option to record its investments in MSRs in order to provide users of the consolidated interim financial statements with better information regarding the effects of prepayment risk and other market factors on the MSRs. Under this election, the Company records a valuation adjustment on its investments in MSRs on a quarterly basis to recognize the changes in fair value in net income as described below. The Company's MSRs represent the right to service mortgage loans. As an owner and manager of MSRs, the Company may be obligated to fund advances of principal and interest payments due to third-party owners of the loans, but not yet received from the individual borrowers. These advances are reported as servicing advances within the "Receivables and other assets" line item on the consolidated balance sheets. MSRs are reported at fair value on the consolidated balance sheets. Although transactions in MSRs are observable in the marketplace, the valuation includes unobservable market data inputs (prepayment speeds, delinquency levels, costs to service and discount rates). Changes in the fair value of MSRs as well as servicing fee income and servicing expenses are reported on the consolidated statements of income (loss). In determining the valuation of MSRs, management used internally developed models that are primarily based on observable market-based inputs but which also include unobservable market data inputs (see Part I, Item 1. Notes to Consolidated Financial Statements— Note 9. Fair Value).

Revenue Recognition on Investments in MSRs

Mortgage servicing fee income represents revenue earned for servicing mortgage loans. The servicing fees are based on a contractual percentage of the outstanding principal balance and recognized as revenue as the related mortgage payments are collected. Corresponding costs to service are charged to expense as incurred. Approximately $3.1 million and $1.4 million in reimbursable servicing advances were receivable at March 31, 2017 and December 31, 2016, respectively, and have been classified within "Receivables and other assets" on the consolidated balance sheets.

Servicing fee income received and servicing expenses incurred are reported on the consolidated statements of comprehensive income (loss). The difference between the fair value of MSRs and their amortized cost basis is recorded on the Consolidated statements of income as “Unrealized gain (loss) on investments in MSRs.” Fair value is generally determined by discounting the expected future cash flows using discount rates that incorporate the market risks and liquidity premium specific to the MSRs and, therefore, may differ from their effective yields.

Revenue Recognition on Securities

Interest income from coupon payments is accrued based on the outstanding principal amount of the RMBS and their contractual terms. Premiums and discounts associated with the purchase of the RMBS are amortized into interest income over the projected lives of the securities using the interest method. Our policy for estimating prepayment speeds for calculating the effective yield is to evaluate historical performance, consensus prepayment speeds, and current market conditions. Adjustments are made for actual prepayment activity.

Repurchase Transactions

We finance the acquisition of our RMBS for our portfolio through repurchase transactions under master repurchase agreements. Repurchase transactions are treated as collateralized financing transactions and are carried at their contractual amounts as specified in the respective transactions. Accrued interest payable is included in “Accrued expenses and other liabilities” on the consolidated balance sheet. Securities financed through repurchase transactions remain on our consolidated balance sheet as an asset and cash received from the purchaser is recorded on our consolidated balance sheet as a liability. Interest paid in accordance with repurchase transactions is recorded in interest expense.

Income Taxes

The Company elected to be taxed as a REIT under the Code commencing with its short taxable year ended December 31, 2013. The Company expects to continue to qualify to be treated as a REIT. As long as the Company qualifies as a REIT, the Company generally will not be subject to U.S. federal income taxes on its taxable income to the extent it annually distributes at least 90% of its REIT taxable income to stockholders and does not engage in prohibited transactions. The Company’s taxable REIT subsidiaries (“TRSs”), CHMI Solutions, Inc. and Aurora, are subject to U.S. federal income taxes on their taxable income.

The Company accounts for income taxes in accordance with ASC 740, *Income Taxes*. ASC 740 requires the recording of deferred income taxes that reflect the net tax effect of temporary differences between the carrying amounts of the Company’s assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, including operating loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in earnings in the period that includes the enactment date. The Company assesses its tax positions for all open tax years and determines if it has any material unrecognized liabilities in accordance with ASC 740. The Company records these liabilities to the extent it deems them more-likely-than-not to be incurred. The Company records interest and penalties related to income taxes within the provision for income taxes in the consolidated statements of income (loss). The Company has not incurred any interest or penalties.

Emerging Growth Company Status

On April 5, 2012, the Jumpstart Our Business Startups Act (the "JOBS Act") was signed into law. The JOBS Act contains provisions that, among other things, reduce certain reporting requirements for qualifying public companies. Because we qualify as an "emerging growth company," we may, under Section 7(a)(2)(B) of the Securities Act of 1933, as amended, delay adoption of new or revised accounting standards applicable to public companies until such standards would otherwise apply to private companies. We have elected to take advantage of this extended transition period until the first to occur of the date that we (i) are no longer an "emerging growth company" or (ii) affirmatively and irrevocably opt out of this extended transition period. As a result, our financial statements may not be comparable to those of other public companies that comply with such new or revised accounting standards. Until the date that we are no longer an "emerging growth company" or affirmatively and irrevocably opt out of the extended transition period, upon issuance of a new or revised accounting standard that applies to our financial statements and that has a different effective date for public and private companies, we will disclose the date on which adoption is required for non-emerging growth companies and the date on which we will adopt the recently issued accounting standard.

Results of Operations

Presented below is a comparison of the periods indicated (dollars in thousands):

Results of Operations

	Three Months Ended March 31,

Interest Income

Interest income for the three month period ended March 31, 2017, was $6.1 million as compared to $6.8 million for the three month period ended March 31, 2016 without the effect of the estimated "catch up" premium amortization (benefit) cost adjustment of approximately $(1.6) million. This adjustment makes the interest income for Servicing Related Assets for the three month period ended March 31, 2016 comparable to interest income for Servicing Related Assets for the three month period ended March 31,2017. The sale of the remaining Excess MSRs in the first quarter of 2017 resulted in reduced interest income in the quarter ended March 31, 2017. The $727,000 decrease in interest income was comprised of a decrease of approximately $2.5 million in Servicing Related Assets and an increase of approximately $1.8 million in RMBS.

Interest Expense

Interest expense for the three month period ended March 31, 2017, was $2.4 million as compared to $1.7 million for the three month period ended March 31, 2016. The $774,000 increase was comprised of a decrease approximately $226,000 from Servicing Related Assets and an increase approximately $1.0 million from RMBS. The changes were primarily due to additional repurchase agreement borrowings and an overall increase in repurchase rates offset by a lower swap cost.

Change in Fair Value of Investments in Servicing Related Assets

The fair value of our investments in Servicing Related Assets for the three-month period ended March 31, 2017, increased by approximately $19.0 million as compared to a decrease of approximately $4.5 million in the three-month period ended March 31, 2016. The increase was a function of the acquisition of Ginnie Mae MSRs as of February 1, 2017 on loans with an aggregate UPB of approximately $4.5 billion and the significant increase in the value of those MSRs, between the time the MSRs were identified to the trade and the closing of the sale.

Change in Fair Value of Derivatives

The fair value of derivatives at March 31, 2017 increased by approximately $1.1 million from December 31, 2016, primarily due to changes in interest rates.

General and Administrative Expense

General and administrative expense for the three month period ended March 31, 2017 increased by approximately $167,000 from the three month period ended March 31, 2016, primarily due to the growth of Aurora.

Management Fees to Affiliate

Management fees for the three month period ended March 31, 2017 increased by approximately $202,000 from the three month period ended March 31, 2016, primarily due to an increase in book value and additional pass through costs.

Net Income Allocated to LTIP - OP Units

Net income allocated to LTIP—OP Units which are owned by directors and officers of the Company and by certain employees of Freedom Mortgage who provide services to us through the Manager, represents approximately 1.1% of net income for the year ended March 31, 2017.

Accumulated Other Comprehensive Income (Loss)

For the period indicated below, our accumulated other comprehensive income (loss) changed due to the following factors (dollars in thousands):

Accumulated Other Comprehensive Income (Loss)

	Three Months Ended March 31, 2017
Accumulated other comprehensive gain (loss), December 31, 2016	$ (6,393)
Other comprehensive income (loss)	1,672
Accumulated other comprehensive gain (loss), March 31, 2017	$ (4,721)

	Three Months Ended March 31, 2016
Accumulated other comprehensive gain (loss), December 31, 2015	$ (197)
Other comprehensive income (loss)	7,332
Accumulated other comprehensive gain (loss), March 31, 2016	$ 7,135

Our GAAP equity changes as the values of our RMBS are marked to market each quarter, among other factors. The primary causes of mark to market changes are changes in interest rates and credit spreads. During the three month period ended March 31, 2017, a 5.7 basis point increase in the 10 Year US Treasury rate caused a net unrealized gain on our RMBS of approximately $1.7 million, recorded in accumulated other comprehensive income.

Non-GAAP Financial Measures

This Management's Discussion and Analysis of Financial Condition and Results of Operations section contains analysis and discussion of non-GAAP measurements. The non-GAAP measurements include the following:

- core earnings; and
- core earnings per average common share.

Core earnings is a non-GAAP financial measure and is defined by the Company as GAAP net income (loss) applicable to common stockholders, excluding realized gain (loss) on RMBS, realized and unrealized (gain) loss on investments in Excess MSRs and MSRs, realized and unrealized gain (loss) on derivatives and changes in fair value of MSRs primarily due to realization of expected cash flows (runoff). MSRs are adjusted to exclude outstanding LTIP-OP units in our Operating Partnership. Additionally, core earnings excludes (i) any tax (benefit) expense on unrealized (gain) loss on MSRs and (ii) any estimated catch up premium authorization (benefit) cost due to the use of current rather than historical estimates of constant prepayment rates for amortization of Excess MSRs. Core earnings are provided for purposes of comparability to other issuers that invest in residential mortgage-related assets. The Company believes providing investors with core earnings, in addition to related GAAP financial measures, gives investors greater transparency into the Company's ongoing operational performance. The concept of core earnings does have significant limitations, including the exclusion of realized and unrealized gains (losses), and may not be comparable to similarly-titled measures of other peers, which may use different calculations. As a result, core earnings should not be considered a substitute for the Company's GAAP net income (loss) or as a measure of the Company's liquidity.

Core Earnings Summary

Core earnings for the three month period ended March 31, 2017, as compared to the three month period ended March 31, 2016, increased by approximately $679,000 or $0.08 per average common share primarily due to slower CPR speeds on conventional MSRs and early pay off ("EPO") protection on the MSR portfolio that we acquired in the first quarter of 2017. This EPO protection will expire on May 31, 2017.

The following table provides GAAP measures of net income (loss) and details with respect to reconciling the aforementioned line items to core earnings and related per average common share amounts, for the periods indicated (dollars in thousands):

	Three Months Ended March 31,	
	2017	**2016**
Net income (loss)	$ 22,587	$ (7,162)
Realized (gain) loss on RMBS, net	256	(320)
Realized (gain) loss on investments in Excess MSRs, net	(6,678)	-
Realized (gain) loss on derivatives, net	1,017	1,461
Unrealized (gain) loss on derivatives, net	(1,082)	5,198
Unrealized (gain) loss on investments in Excess MSRs	-	2,307
Unrealized (gain) loss on investments in MSRs	(12,312)	2,232
Tax (benefit) expense on unrealized (gain) loss on MSRs	1,351	(629)
Estimated "catch up" premium amortization (benefit) cost	-	1,617
Changes due to realization of expected cash flows	(953)	(478)
Yield maintenance income	750	-
Total core earnings:	$ 4,936	$ 4,226
Core earnings attributable to noncontrolling interests in Operating Partnership	(89)	(58)
Core Earnings Attributable to Common Stockholders	**$ 4,847**	**$ 4,168**
Core Earnings Attributable to Common Stockholders, per Share	**$ 0.63**	**$ 0.55**
GAAP Net income (Loss) Per Share of Common Stock	**$ 2.91**	**$ (0.94)**

Our Portfolio

Excess MSRs

As of December 31, 2016, we had approximately $29.4 million of estimated carrying value of Excess MSRs which were sold to Freedom Mortgage on February 1, 2017. As a result, we have no investments in Excess MSRs at March 31, 2017.

Our investments at December 31, 2016 represented between a 50% and 85% interest in the Excess MSRs on one pool of mortgage loans with an aggregate UPB at December 31, 2016 of approximately $6.1 billion. Freedom Mortgage was the servicer of the loans underlying these Excess MSRs and earned a basic fee and all ancillary income associated with the portfolio in exchange for providing all servicing functions. In addition, Freedom Mortgage retained the remaining interest in the Excess MSRs. We did not have any servicing duties, liabilities or obligations associated with the servicing of the portfolio underlying these Excess MSRs. These investments in Excess MSRs were subject to a recapture agreement with Freedom Mortgage which has been terminated in connection with the sale described above.

Excess MSR Collateral Characteristics

As of December 31, 2016

		Collateral Characteristics						
	Current Carrying Amount	Original Principal Balance	Current Principal Balance	Number of Loans	WA Coupon	WA Maturity (months)	Weighted Average Loan Age (months)	ARMs %(A)
Excess MSR Pool 2								
Original Pool	$ 12,734	$10,704,024	$ 3,695,561	26,338	2.58%	304	54	100.0%
Recaptured Loans	15,792	-	2,357,581	15,051	3.56%	333	12	0.0%
Recapture Agreement	866	-	-	-	-	-	-	-
Excess MSR Pool 2 Total/WA	**$ 29,392**	**$10,704,024**	**$ 6,053,142**	**41,389**	2.96%	315	38	61.1%

(A) ARMs % represents the percentage of the total principal balance of the pool that corresponds to adjustable-rate residential mortgage loan (“ARMs”) and hybrid ARMs.

MSRs

By virtue of our acquisition of Aurora on May 29, 2015, we acquired its portfolio of Fannie Mae and Freddie Mac MSRs. On October 30, 2015, Aurora acquired a portfolio of MSRs on Fannie Mae and Freddie Mac MSRs with an aggregate UPB of approximately $1.4 billion. On January 29, 2016, Aurora acquired a portfolio of MSRs on mortgage loans owned or securitized by Fannie Mae with an aggregate unpaid principal balance of approximately $463 million. In addition, on June 30, 2016, Aurora acquired a portfolio of MSRs on mortgage loans owned or securitized by Fannie Mae with an aggregate unpaid principal balance of approximately $1.3 billion. The following tables set forth certain characteristics of the mortgage loans underlying those MSRs as of the dates indicated (dollars in thousands):

MSR Collateral Characteristics

As of March 31, 2017

		Collateral Characteristics					
	Current Carrying Amount	Current Principal Balance	WA Coupon	WA Servicing Fee	WA Maturity (months)	Weighted Average Loan Age (months)	ARMs %(A)
MSRs							
Conventional	$ 31,088	$ 3,170,673	3.81%	0.25%	282	34	0.1%
Government	45,610	4,421,039	3.36%	0.30%	342	11	-%
MSR Total/WA	**$ 76,698**	**$ 7,591,712**	3.55%	0.28%	317	20	0.0%

Table of Contents

As of December 31, 2016

	Current Carrying Amount	Collateral Characteristics: Current Principal Balance	WA Coupon	WA Servicing Fee	WA Maturity (months)	Weighted Average Loan Age (months)	ARMs %(A)
MSRs							
Conventional	$ 19,761	$ 2,016,351	3.76%	0.25%	273	31	0.2%
MSR Total/WA	**$ 19,761**	**$ 2,016,351**	3.76**%**	0.25**%**	273	31	0.2**%**

(A) ARMs % represents the percentage of the total principal balance of the pool that corresponds to ARMs and hybrid ARMs.

RMBS

The following tables summarize the characteristics of our RMBS portfolio and certain characteristics of the collateral underlying our RMBS as of the dates indicated (dollars in thousands):

RMBS Characteristics

As of March 31, 2017

Asset Type	Original Face Value	Book Value	Gross Unrealized Gains	Gross Unrealized Losses	Carrying Value(A)	Number of Securities	Rating	Weighted Average Coupon	Weighted Average Yield(C)	Weighted Average Maturity (Years)(D)
RMBS										
Fannie Mae	$ 772,819	$ 732,675	$ 1,766	$ (6,174)	$ 728,267	101	(B)	3.78%	3.56%	25
Freddie Mac	389,576	371,377	1,063	(2,789)	369,651	45	(B)	3.77%	3.52%	26
CMOs	50,375	39,725	1,497	(84)	41,138	12	Unrated	4.47%	5.10%	12
Total/Weighted Average	**$ 1,212,770**	**$ 1,143,777**	**$ 4,326**	**$ (9,047)**	**$ 1,139,056**	**158**		**3.80%**	**3.62%**	**25**

As of December 31, 2016

Asset Type	Original Face Value	Book Value	Gross Unrealized Gains	Gross Unrealized Losses	Carrying Value(A)	Number of Securities	Rating	Weighted Average Coupon	Weighted Average Yield(C)	Weighted Average Maturity (Years)(D)
RMBS										
Fannie Mae	$ 493,645	$ 454,012	$ 1,517	$ (6,592)	$ 448,937	68	(B)	3.74%	3.52%	24
Freddie Mac	222,469	200,207	587	(2,691)	198,103	27	(B)	3.62%	3.44%	26
CMOs	34,596	24,086	857	(79)	24,864	9	Unrated	4.78%	4.24%	12
Total/Weighted Average	**$ 750,710**	**$ 678,305**	**$ 2,961**	**$ (9,362)**	**$ 671,904**	**104**		**3.74%**	**3.53%**	**24**

(A) See “Part I, Item 1. Notes to Consolidated Financial Statements—Note 9. Fair Value” regarding the estimation of fair value, which is equal to carrying value for all securities.

(B) We used an implied AAA rating for the Fannie Mae and Freddie Mac securities, other than CMOs, which are unrated.

(C) The weighted average yield is based on the most recent annualized monthly interest income, divided by the Book Value of settled securities. Prior period amounts have been reclassified to conform to current period presentation.

(D) The weighted average maturity is based on the timing of expected principal reduction on the assets.

The following table summarizes the net interest spread of our RMBS portfolio as of the dates indicated:

Net Interest Spread

	March 31, 2017	December 31, 2016
Weighted Average Asset Yield	2.77%	3.22%
Weighted Average Interest Expense	1.35%	1.56%
Net Interest Spread	**1.42%**	**1.66%**

Liquidity and Capital Resources

Liquidity is a measurement of our ability to meet potential cash requirements, including ongoing commitments to repay borrowings, fund and maintain investments and other general business needs. Additionally, to maintain our status as a REIT under the Code, we must distribute annually at least 90% of our REIT taxable income. In future years, a portion of this requirement may be able to be met through stock dividends, rather than cash, subject to limitations based on the value of our stock.

Our primary sources of funds for liquidity consist of cash provided by operating activities (primarily income from our investments in Excess MSRs and RMBS and net servicing income from our MSRs), sales or repayments of RMBS and borrowings under repurchase agreements and the MSR Financing Facility (as defined below).

In the future, sources of funds for liquidity may include potential additional MSR financing, warehouse agreements, securitizations and the issuance of equity or debt securities, when feasible. The recent sale of our common stock resulted in approximately $81.1 million net proceeds which have been initially invested in Agency RMBS pending re-deployment of a significant portion of such proceeds in MSRs. Our primary uses of funds are the payment of interest, management fees, outstanding commitments, other operating expenses, investments in new or replacement assets and the repayment of borrowings, as well as dividends. We seek to maintain adequate cash reserves and other sources of available liquidity to meet any margin calls resulting from decreases in value related to a reasonably possible (in the opinion of management) change in interest rates.

As of the date of this filing, we have sufficient liquid assets to satisfy all of our short-term recourse liabilities. With respect to the next twelve months, we expect that our cash on hand combined with our cash flow provided by operations will be sufficient to satisfy our anticipated liquidity needs with respect to our current investment portfolio, including related financings, potential margin calls and operating expenses. While it is inherently more difficult to forecast beyond the next twelve months, we currently expect to meet our long-term liquidity requirements through our cash on hand and, if needed, additional borrowings, proceeds received from repurchase agreements and similar financings, proceeds from equity offerings and the liquidation or refinancing of our assets.

Our operating cash flow differs from our net income due primarily to: (i) accretion of discount or premium on our RMBS and Excess MSRs, (ii) unrealized gains or losses on our Servicing Related Assets, and (iii) OTTI on our securities, if any.

Repurchase Agreements

As of March 31, 2017, we had repurchase agreements with 24 counterparties and approximately $773.3 million of outstanding repurchase agreement borrowings from 17 of those counterparties, which were used to finance RMBS. As of March 31, 2017, our exposure (defined as the amount of cash and securities pledged as collateral, less the borrowing under the repurchase agreement) to any of the counterparties under the repurchase agreements did not exceed five percent of the Company’s equity. Under these agreements, which are uncommitted facilities, we sell a security to a counterparty and concurrently agree to repurchase the same security at a later date plus the interest charged. The sale price represents financing proceeds and the difference between the sale and repurchase prices represents interest on the financing. The price at which the security is sold generally represents the market value of the security less a discount or “haircut.” The weighted average haircut on our repurchase debt at March 31, 2017, was approximately 5.2%. During the term of the repurchase agreement, which can be as short as 30 days, the counterparty holds the security and posted margin as collateral. The counterparty monitors and calculates what it estimates to be the value of the collateral during the term of the agreement. If this value declines by more than a de minimis threshold, the counterparty requires us to post additional collateral (or “margin”) in order to maintain the initial haircut on the collateral. This margin is typically required to be posted in the form of cash and cash equivalents. Furthermore, we are, from time to time, a party to derivative agreements or financing arrangements that may be subject to margin calls based on the value of such instruments.

Set forth below is the average aggregate balance of borrowings under the Company's repurchase agreements for each of the periods shown and the aggregate balance as of the end of each such period (dollars in thousands):

Repurchase Agreement Average and Maximum Amounts

Quarter Ended	Average Monthly Amount	Maximum Month-End Amount	Quarter Ending Amount
March 31, 2017	$ 727,550	$ 773,317	$ 773,317
December 31, 2016	$ 636,880	$ 688,628	$ 594,615
September 30, 2016	$ 511,475	$ 537,139	$ 466,209
June 30, 2016	$ 485,476	$ 544,862	$ 456,075
March 31, 2016	$ 406,360	$ 414,153	$ 398,374
December 31, 2015	$ 408,227	$ 443,446	$ 385,560
September 30, 2015	$ 396,013	$ 440,727	$ 440,727
June 30, 2015	$ 382,333	$ 384,386	$ 384,386
March 31, 2015	$ 376,083	$ 377,361	$ 373,868
December 31, 2014	$ 354,878	$ 363,493	$ 362,126
September 30, 2014	$ 315,830	$ 329,239	$ 329,239
June 30, 2014	$ 288,881	$ 293,747	$ 293,747
March 31, 2014	$ 263,505	$ 269,982	$ 269,982
December 31, 2013	$ 267,038	$ 270,555	$ 261,302
September 30, 2013	$ -	$ -	$ -

The increases in the Company's borrowings under its repurchase agreements were primarily due to the temporary investment of funds received from the following sources pending the redeployment of a portion of such funds into MSR investments: amounts borrowed under the MSR Financing Facility and the sale of our Excess MSRs.

These short-term borrowings were used to finance certain of our investments in RMBS. The RMBS repurchase agreements are guaranteed by the Company. The weighted average difference between the market value of the assets and the face amount of available financing for the RMBS repurchase agreements, or the haircut, was 5.2% and 5.4% as of March 31, 2017 and December 31, 2016, respectively. The following tables provide additional information regarding our repurchase agreements (dollars in thousands):

Repurchase Agreement Characteristics

As of March 31, 2017

	RMBS Market Value	Repurchase Agreements	Weighted Average Rate
Less than one month	$ 155,868	$ 149,363	1.04%
One to three months	282,103	269,063	0.98%
Greater than three months	374,364	354,891	1.08%
Total/Weighted Average	**$ 812,335**	**$ 773,317**	**1.04%**

As of December 31, 2016

	RMBS Market Value	Repurchase Agreements	Weighted Average Rate
Less than one month	$ 65,121	$ 60,690	1.14%
One to three months	464,585	456,502	0.91%
Greater than three months	78,854	77,423	0.90%
Total/Weighted Average	**$ 608,560**	**$ 594,615**	**0.93%**

The amount of collateral as of March 31, 2017 and December 31, 2016, including cash, was $818.2 million and $632.1 million, respectively.

The weighted average term to maturity of our borrowings under repurchase agreements as of March 31, 2017 and December 31, 2016 was 78 days and 65 days, respectively.

MSR Financing Facility

In September 2016, Aurora and Cherry Hill QRS III, LLC (“QRS III”) entered into a loan and security agreement (the "MSR Financing Facility"), pursuant to which Aurora and QRS III pledged their respective rights in all existing and future MSRs for loans owned or securitized by Fannie Mae to secure borrowings up to a maximum of $25 million outstanding at any one time. The facility has a two-year revolving period, subject to extension by agreement, during which only interest payments are due. Borrowings bear interest at a spread over one month LIBOR. At the end of the revolving period, the outstanding amount will be converted to a three-year term loan with monthly payments of interest (calculated as a spread over the rate for one-year interest rate swaps) and principal (calculated on a ten-year amortization schedule). At March 31, 2017 and December 31, 2016, approximately $16.0 million and $14.0 million, respectively, was outstanding under the MSR Financing Facility.

Cash Flows

Operating and Investing Activities

Our operating activities provided cash of approximately $259.0 million and our investing activities used cash of approximately $464.0 million for the three month period ended March 31, 2017. The cash provided by operating activities and the cash used in investing activities is a result of the execution of our ongoing investment strategy.

Dividends

We conduct our operations in a manner intended to satisfy the requirements for qualification as a REIT for U.S. federal income tax purposes. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its REIT taxable income, without regard to the deduction for dividends paid and excluding net capital gains, and that it pay tax at regular corporate rates to the extent that it annually distributes less than 100% of its taxable income. We intend to make regular quarterly distributions of all or substantially all of our REIT taxable income to holders of our common stock out of assets legally available for this purpose, if and to the extent authorized by our board of directors. Before we pay any dividend, whether for U.S. federal income tax purposes or otherwise, we must first meet both our operating requirements and debt service on our repurchase agreements and other debt payable. If our cash available for distribution is less than our REIT taxable income, we could be required to sell assets or borrow funds to make cash distributions, or we may make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities. We will make distributions only upon the authorization of our board of directors. The amount, timing and frequency of distributions will be authorized by our board of directors based upon a variety of factors, including:

- actual results of operations;
- our level of retained cash flows;
- our ability to make additional investments in our target assets;
- restrictions under Maryland law;
- any debt service requirements;
- our taxable income;
- the annual distribution requirements under the REIT provisions of the Code; and
- other factors that our board of directors may deem relevant

Our ability to make distributions to our stockholders will depend upon the performance of our investment portfolio, and, in turn, upon our Manager’s management of our business. Distributions will be made quarterly in cash to the extent that cash is available for distribution. We may not be able to generate sufficient cash available for distribution to pay distributions to our stockholders. In addition, our board of directors may change our distribution policy in the future.

We make distributions based on a number of factors, including an estimate of taxable earnings per common share. Dividends distributed and taxable and GAAP earnings will typically differ due to items such as fair value adjustments, differences in premium amortization and discount accretion, and nondeductible general and administrative expenses. Our dividend per share may be substantially different than our taxable earnings and GAAP earnings per share. Our GAAP earnings (loss) per share for the three month periods ended March 31, 2017 and March 31, 2016 were $2.90 and ($0.94), respectively.

Off-balance Sheet Arrangements

As of March 31, 2017, we did not have any off-balance sheet arrangements. We did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured investment vehicles, or special purpose or variable interest entities, established to facilitate off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities or entered into any commitment or intend to provide additional funding to any such entities.

Contractual Obligations

Our contractual obligations as of March 31, 2017 and December 31, 2016, included repurchase agreements, borrowings under the $25 million NexBank term loan, our management agreement with our Manager, our subservicing agreement with Freedom Mortgage and our joint marketing recapture agreement with Freedom Mortgage. Pursuant to our management agreement, our Manager is entitled to receive a management fee and the reimbursement of certain expenses.

The following table summarizes our contractual obligations as of the dates indicated (dollars in thousands):

Contractual Obligations Characteristics

As of March 31, 2017

	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	Total
Repurchase agreements					
Borrowings under repurchase agreements	$ 773,317	$ -	$ -	$ -	$ 773,317
Interest on repurchase agreement borrowings[(A)]	$ 900	$ -	$ -	$ -	$ 900
MSR Financing Facility					
Borrowings under MSR Financing facility	$ -	$ 1,899	$ 14,101	$ -	$ 16,000
Interest on MSR Financing borrowings	$ 750	$ 1,570	$ 1,090	$ -	$ 3,410

As of December 31, 2016

	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	Total
Repurchase agreements					
Borrowings under repurchase agreements	$ 594,615	$ -	$ -	$ -	$ 594,615
Interest on repurchase agreement borrowings[(A)]	$ 877	$ -	$ -	$ -	$ 877
Term Loan					
Borrowings under Term Loan facility	$ 2,841	$ 6,045	$ -	$ -	$ 8,886
Interest on Term Loan borrowings	$ 424	$ 350	$ -	$ -	$ 774
MSR Financing Facility					
Borrowings under MSR Financing facility	$ -	$ 1,388	$ 12,612	$ -	$ 14,000
Interest on MSR Financing borrowings	$ 622	$ 1,313	$ 1,075	$ -	$ 3,010

(A) Interest expense is calculated based on the interest rate in effect at March 31, 2017 and includes all interest expense incurred and expected to be incurred in the future through the contractual maturity of the associated repurchase agreement.

The table above does not include amounts due under the management agreement with our Manager. Those payments are discussed below.

Management Agreement

The management agreement with our Manager provides that our Manager is entitled to receive a management fee, the reimbursement of certain expenses and, in certain circumstances, a termination fee. The management fee is an amount equal to 1.5% per annum of our stockholders’ equity, adjusted as set forth in the management agreement, and calculated and payable quarterly in arrears. We will also be required to pay a termination fee equal to three times the average annual management fee earned by our Manager during the two four-quarter periods ending as of the end of the fiscal quarter preceding the date of termination. Such termination fee will be payable upon termination of the management agreement by us without cause or by our Manager if we materially breach the management agreement.

We pay all of our direct operating expenses, except those specifically required to be borne by our Manager under the management agreement. Our Manager is responsible for all costs incident to the performance of its duties under the management agreement. Our Manager uses the proceeds from its management fee in part to pay Freedom Mortgage for services provided under the Services Agreement between the Manager and Freedom Mortgage. Our chief financial officer receives a nominal portion of his overall compensation directly from Aurora for acting as its president. With that exception, our officers receive no cash compensation directly from us. Our Manager provides us with our officers. Our Manager is entitled to be reimbursed for an agreed upon portion of the costs of the wages, salary and other benefits with respect to our chief financial officer, controller and general counsel, originally based on the percentages of their working time and efforts spent on matters related to our company. The amount of the wages, salary and benefits reimbursed with respect to the officers our Manager provides to us is subject to the approval of the compensation committee of our board of directors.

The term of the management agreement will expire on October 22, 2020 and will be automatically renewed for a one-year term on such date and on each anniversary of such date thereafter unless terminated or not renewed as described below. Either we or our Manager may elect not to renew the management agreement upon expiration of its initial term or any renewal term by providing written notice of non-renewal at least 180 days, but not more than 270 days, before expiration. In the event we elect not to renew the term, we will be required to pay our Manager the termination fee described above. We may terminate the management agreement at any time for cause effective upon 30 days prior written notice of termination from us to our Manager, in which case no termination fee would be due. Our board of directors will review our Manager’s performance prior to the automatic renewal thereof and, as a result of such review, upon the affirmative vote of at least two-thirds of the members of our board of directors or of the holders of a majority of our outstanding common stock, we may terminate the management agreement based upon unsatisfactory performance by our Manager that is materially detrimental to us or a determination by our independent directors that the management fees payable to our Manager are not fair, subject to the right of our Manager to prevent such a termination by agreeing to a reduction of the management fees payable to our Manager. Upon any termination of the management agreement based on unsatisfactory performance or unfair management fees, we are required to pay our Manager the termination fee described above. Our Manager may terminate the management agreement, without payment of the termination fee, in the event we become regulated as an investment company under the Investment Company Act. Our Manager may also terminate the management agreement upon 60 days’ written notice if we default in the performance of any material term of the management agreement and the default continues for a period of 30 days after written notice to us, whereupon we would be required to pay our Manager the termination fee described above.

Subserviceing Agreement

Freedom Mortgage is directly servicing the Company’s portfolio of Fannie Mae and Freddie Mac MSRs, and beginning in February 2017, Ginnie Mae MSRs, pursuant to a subservicing agreement entered into on June 10, 2015. The agreement has an initial term of three years, expiring on September 1, 2018, and is subject to automatic renewal for additional three year terms unless either party chooses not to renew. The agreement may be terminated without cause by either party by giving notice as specified in the agreement. If the agreement is not renewed by the Company or terminated by the Company without cause, market rate de-boarding fees will be due to the subservicer. Under that agreement, Freedom Mortgage agrees to service the applicable mortgage loans in accordance with applicable law and the requirements of the applicable agency. The Company pays fees for specified services.

Joint Marketing Recapture Agreement

In June 2016, Aurora entered into a joint marketing recapture agreement with Freedom Mortgage. Pursuant to this agreement, Freedom Mortgage will attempt to refinance certain mortgage loans underlying Aurora's servicing MSR portfolio as directed by Aurora. If a loan is refinanced, Aurora will pay Freedom Mortgage a fee for its origination services. Freedom will be entitled to sell the loan for its own benefit and will transfer the related MSR to Aurora. The agreement has an initial term of one year, subject to automatic renewals of one year each and subject to termination by either party upon 60 days prior notice. All new loans must qualify for sale to Fannie Mae or Freddie Mac and meet other conditions set forth in the agreement. During the quarter ended March 31, 2017, MSRs on 40 loans with an aggregate unpaid principal balance of approximately $10.2 million had been received from Freedom Mortgage which generated approximately $24,600 in fees due to Freedom Mortgage.

Inflation

Virtually all of our assets and liabilities are financial in nature. As a result, interest rates and other factors affect our performance more so than inflation, although inflation rates can often have a meaningful influence over the direction of interest rates. Furthermore, our financial statements are prepared in accordance with GAAP and our distributions are determined by our board of directors primarily based on our REIT taxable income, and, in each case, our activities and balance sheet are measured with reference to historical cost and/or fair market value without considering inflation.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We seek to manage our risks related to the credit quality of our assets, interest rates, liquidity, prepayment speeds and market value while, at the same time, seeking to provide an opportunity to stockholders to realize attractive risk-adjusted returns through ownership of our capital stock. While we do not seek to avoid risk completely, we believe the risk can be quantified from historical experience and seek to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Interest Rate Risk

Interest rates are highly sensitive to many factors, including fiscal and monetary policies and domestic and international economic and political considerations, as well as other factors beyond our control. We are subject to interest rate risk in connection with our assets and our related financing obligations. In general, we finance the acquisition of certain of our assets through financings in the form of repurchase agreements and bank facilities. We expect to make use of MSR financing, warehouse facilities, securitizations, re-securitizations, and public and private equity and debt issuances in addition to transaction or asset specific funding arrangements. In addition, the values of our Servicing Related Assets are highly sensitive to changes in interest rates, historically increasing when rates rise and decreasing when rates decline. Subject to maintaining our qualification as a REIT, we attempt to mitigate interest rate risk through utilization of hedging instruments, primarily interest rate swap agreements. We may also use financial futures, options, interest rate cap agreements, and forward sales. These instruments are intended to serve as a hedge against future interest rate changes on our borrowings.

Interest Rate Effect on Net Interest Income

Our operating results depend in large part on differences between the income earned on our assets and our cost of borrowing and hedging activities. The costs of our borrowings are generally based on prevailing market interest rates. During a period of rising interest rates, our borrowing costs generally will increase (1) while the yields earned on our leveraged fixed-rate mortgage assets will remain static and (2) at a faster pace than the yields earned on our leveraged adjustable-rate and hybrid adjustable-rate RMBS, which could result in a decline in our net interest spread and net interest margin. The severity of any such decline would depend on our asset/liability composition at the time as well as the magnitude and duration of the interest rate increase. Further, an increase in short-term interest rates could also have a negative impact on the market value of our assets, other than our Servicing Related Assets. A decrease in interest rates could have a negative impact on the market value of our Servicing Related Assets. If any of these events happen, we could experience a decrease in net income or incur a net loss during these periods, which could adversely affect our liquidity and results of operations.

Hedging techniques are partly based on assumed levels of prepayments of our assets, specifically our RMBS. If prepayments are slower or faster than assumed, the life of the investment will be longer or shorter, which would reduce the effectiveness of any hedging strategies we may use and may cause losses on such transactions. Hedging strategies involving the use of derivatives are highly complex and may produce volatile returns.

Interest Rate Cap Risk

Any adjustable-rate RMBS that we acquire will generally be subject to interest rate caps, which potentially could cause such RMBS to acquire many of the characteristics of fixed-rate securities if interest rates were to rise above the cap levels. This issue will be magnified to the extent we acquire adjustable-rate and hybrid adjustable-rate RMBS that are not based on mortgages which are fully indexed. In addition, adjustable-rate and hybrid adjustable-rate RMBS may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. This could result in our receipt of less cash income on such assets than we would need to pay the interest cost on our related borrowings. To mitigate interest rate mismatches, we may utilize the hedging strategies discussed above under “—Interest Rate Risk.” Actual economic conditions or implementation of decisions by our Manager may produce results that differ significantly from the estimates and assumptions used in our models.

Prepayment Risk; Extension Risk

The following tables summarize the estimated change in fair value of our interests in the Excess MSRs as of the dates indicated given several parallel changes in the discount rate and voluntary prepayment rate (dollars in thousands):

Excess MSR Fair Value Changes

The sensitivity analysis is hypothetical and is presented solely to assist an analysis of the possible effects on the fair value under various scenarios. It is not a prediction of the amount or likelihood of a change in any particular scenario. In particular, the results are calculated by stressing a particular economic assumption independent of changes in any other assumption. In practice, changes in one factor may result in changes in another, which might counteract or amplify the sensitivities. In addition, changes in the fair value based on a 10% variation in an assumption generally may not be extrapolated because the relationship of the change in the assumption to the change in fair value may not be linear.

Counterparty Risk

When we engage in repurchase transactions, we generally sell securities to lenders (i.e., repurchase agreement counterparties) and receive cash from the lenders. The lenders are obligated to resell the same securities back to us at the end of the term of the transaction. Because the cash we receive from the lender when we initially sell the securities to the lender is less than the value of those securities (this difference is the haircut), if the lender defaults on its obligation to resell the same securities back to us we would incur a loss on the transaction equal to the amount of the haircut (assuming there was no change in the value of the securities). As of March 31, 2017, the Company’s exposure (defined as the amount of cash and securities pledged as collateral, less the borrowing under the repurchase agreement) to any of the counterparties under the repurchase agreements did not exceed five percent of the Company’s equity.

Our interest rate swaps are required to be cleared on an exchange which greatly mitigates, but does not entirely eliminate, counterparty risk.

Our investments in Servicing Related Assets are dependent on the mortgage sub-servicer, Freedom Mortgage, to perform its sub-servicing obligations. If our sub-servicer fails to perform its obligations and is terminated by one or more Agencies as an approved servicer, the value of our MSRs may be adversely affected. In addition, when we purchase MSRs from third parties, we rely, to a certain extent, on the ability and willingness of the sellers to perform their contractual obligations to remedy breaches of representations and warranties or to repurchase the affected loan and indemnify us for any losses.

Funding Risk

To the extent available on desirable terms, we expect to continue to finance our RMBS with repurchase agreement financing. We also anticipate continuing to finance our MSRs with bank loans secured by a pledge of those MSRs. Over time, as market conditions change, in addition to these financings, we may use other forms of leverage. Weakness in the financial markets, the residential mortgage markets and the economy generally could adversely affect one or more of our potential lenders and could cause one or more of our potential lenders to be unwilling or unable to provide us with financing or to increase the costs of that financing.

Liquidity Risk

Our Servicing Related Assets, as well as some of the assets that may in the future comprise our portfolio, are not publicly traded. A portion of these assets may be subject to legal and other restrictions on resale or will otherwise be less liquid than publicly-traded securities. The illiquidity of these assets may make it difficult for us to sell such assets if the need or desire arises, including in response to changes in economic and other conditions.

Credit Risk

Although we expect relatively low credit risk with respect to our portfolios of Excess MSRs and our Agency RMBS, our investment in MSRs exposes us to the credit risk of borrowers. To the extent we invest in non-Agency RMBS and prime mortgage loans, we expect to encounter credit risk related to these asset classes.

To date, our only investments in non-Agency RMBS have been credit risk transfer securities issued by Fannie Mae and Freddie Mac and have been classified within "RMBS, available-for-sale" on the consolidated balance sheet.

Item 4. Controls and Procedures

Disclosure Controls and Procedures. The Company's President and its Chief Financial Officer, have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d -15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act")) as of the end of the period covered by this report. The Company's disclosure controls and procedures are designed to provide reasonable assurance that information is recorded, processed, summarized and reported accurately and on a timely basis. Based on such evaluation, the Company's President and the Company's Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting. There have been no changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, the Company may be involved in various claims and legal actions in the ordinary course of business. As of March 31, 2017, the Company was not involved in any material legal proceedings.

Item 1A. Risk Factors

The management agreement with our Manager was not negotiated on an arm's-length basis and may not be as favorable to us as if it had been negotiated with an unaffiliated third party and may be costly and difficult to terminate.

The management agreement that we have entered into with our Manager was negotiated between related parties, and its terms, including fees payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party. Various potential and actual conflicts of interest may arise from the activities of Freedom Mortgage and its affiliates by virtue of the fact that our Manager is controlled by Freedom Mortgage.

Termination of our management agreement without cause is subject to several conditions which may make such a termination difficult and a significant termination fee could be payable by us. That fee will increase the effective cost to us of terminating the management agreement, thereby adversely affecting our ability to terminate our Manager without cause.

Pursuant to the management agreement, our Manager will not assume any responsibility other than to render the services called for thereunder and will not be responsible for any action of our board of directors in following or declining to follow the Manager's advice or recommendations. Under the terms of the management agreement, our Manager, Freedom Mortgage, and their affiliates and each of their officers, directors, trustees, members, stockholders, partners, managers, Investment Committee members, employees, agents, successors and assigns, will not be liable to us for acts or omissions performed in accordance with and pursuant to the management agreement, except because of acts constituting bad faith, willful misconduct, gross negligence, fraud or reckless disregard of their duties under the management agreement. In addition, we will indemnify our Manager, Freedom Mortgage, and their affiliates and each of their officers, directors, trustees, members, stockholders, partners, managers, Investment Committee members, employees, agents, successors and assigns, with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts of our Manager not constituting bad faith, willful misconduct, gross negligence, fraud or reckless disregard of duties, performed in good faith in accordance with and pursuant to the management agreement.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not Applicable.

Item 5. Other Information

Not Applicable.

Freedom Mortgage Corporation
907 Pleasant Valley Ave., Suite 3
Mount Laurel, New Jersey 08054

Re: Letter Agreement Dated November 1, 2016, between Cherry Hill Mortgage Investment Corporation and Freedom Mortgage Corporation

---

Ladies and Gentlemen:

Reference is made to the above-reference agreement (the "Agreement") regarding the sale of the Excess MSRs and the timing of yield maintenance payments. Capitalized terms used but not defined herein shall have the meanings set forth in the Agreement.

Buyer and Seller agree to amend the Agreement to provide that the yield maintenance payments will be made monthly, rather than quarterly. Accordingly, the Agreement is hereby amended by deleting paragraph 4 thereof in its entirety and replacing it with the following:

"Buyer shall make yield maintenance payments monthly in an amount equal to two hundred and fifty thousand dollars ($250,000) on the first day of each month, commencing December 1, 2016. If any such date is not a business day, such payment shall be made on the first succeeding business day thereafter. Each such payment shall be made in immediately available funds to the account designated by Seller."

If you are in agreement with the above, please execute this letter in the space below and return a complete copy to the undersigned whereupon this letter shall constitute a binding agreement between us.

Very truly yours,

CHERRY HILL MORTGAGE INVESTMENT CORPORATION

By: /s/ Martin Levine

Certification

I, Jeffrey Lown II, certify that:

1. I have reviewed this Form 10-Q of Cherry Hill Mortgage Investment Corporation;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
